To the Truly Vertuous, and most Honored Collonel, Daniel Pudzee, Esq;

Most worthy Sir,

IT THen first I entred upon the Composing of this Subjest, I had almost concluded the concealing bereof; But after a due poise, and some deep reasonings with my felf, I consented to the publishing hereof; and knowing your Worthynesse, and Ability in this Subject, I Shall first Crave pardon, and Humbly intreat Admittance, to present this tender Babe unto your Judicions Patronage, not doubting but that your Candour, and most Noble Quality, will descend so as to acquit me of my presumption , Seeing I have made my felf a Transgreffor by my bold Attempt. Worthy Sir, I confesse I need not acquaint you of what Nature and Operation a Divine Mind is of, or bow neer it imitates its Original in its Ads, and with what Freedome and Liberality it doth elemonstrate it felf, that it by its felf, cannot Erre from its own dignity and Central vertue, dith always Thick

Think, Doe, and Operate somthing like, and worthy of its felf. All this through the blessing of God. The gift of nature, bath happened in full unto you: for who bath more neglected the vulgar operations of the Elements upon his nature than your felf, and bath applyed your self unto the most prosound and most prositable Sciences? and not only so, but you are much like Mother Nature, in procreating, and contributing to the infirm and weak ones, Gratis: Kind Sir, I befeech your Favour not to blame me for speaking the truth, I do it on purpose that others may entertain a good mind, and take you for an example; for I wish with Moses, would to God all Gods People were found Prophesying, or doing good; that our Harmony may be encreased, Ge.

Sir, the reason of this Dedieation is this, those so many inseparable merits in you, which appear in my sight, are worthy of all Godly Commendation, and more than Humane Estimation; seeing you cease not your most Ingenious Labour, insearching after the Radix of these most worthy Sciences of Physick, and Philosophy, with their Essences. Therefore I think it best to apply my self with this small work of mine to one Learned, wise, and Honest, who doth both Love and Understand the Dialest of this Divine Mystery, God in Nature producing all things according to its own Species, and not to trust it in the hand of one who is ignorant of the Sublimity bereof.

Sir, I judge it needlesse to acquaint you with the usefulnesse of this work, as being such, whereby wife Men is may Learn the possibility and vertue of all things growing in the Vegetable Kingdom, as Trees, and Herbs, nore and something of the Animal, as Beasts, both Magical his and Physical, all which tends to the Health and Profit of the Man-kind.

worthy Sir, it is not questioned, neither will it be doubted, but that this weak work will gain a freer Current through the world, being stampt with your generous name, and this labour will bear the better lustre upon it being such a stranger in our times, who happily will want the assistance of you so able a Personage, to both defend and conduct it to its true period, and all the way without question will find the better entertainment, and be the more welcome to every good mans hand.

Know DEAR SIR, far be it from me to make your name a refuge to my defects, to escape my self, therefore I shall only aim to make the best of what you shall find in this book yours, and not to add any thing to decline your worth: All that I have to Glory in is, that by Providence, so worthy a Person both in Learning and Knowledge was thought upon, whose Judgement is ripe, and Understanding is seasoned with a farr higher degree in this Art, than what is here laid down, therefore blessed be God on my part. You most worthy Sir, are the sittest both to Protest and Judge hereof. Truly Sir it do h not a little trouble me, that Nature hath been no more Liberal to me in Terms of Expression, to demonstrate my thankfulnesse, in hopes of your good will, if you shall please to vouch afe the Acceptance of this, as a Testim-

A 3

Ay of the Honor I bear unto your vertues, which will be an attribute too honourable, and not besitting my weak Genious, yet well-pleasing as from the sweet and radical aspects of your Honours favour. But because many words may be a cause, as often it doth, of suspition of dissimulation of slattery, both which I ever hated, I shall, according to the wonted Custom of a wise State, to elect one in chief, and be the most wise and most honest, for the Protection of their Councels, I shall commit what you are most worthyly worthy of, if it were the most accomplished, to your most gentle turition; wishing you all temporal selicities in this life, and the sullness of the unity of God in that which is to come, and shall in the unity of Jesus Christ and a Cordial assertion subscribe my self, SIR,

Your most Humble Servant, Will. Will.

To bis Honored Friend Mr. VVilliams on bis Occult Physick.

As

t-

d

y

O Speak in commendation of this Incomparable Peece is an Herculean work; But yet the Peece it felf. can, and doth do it. Yet because they which receive much cannot but declare much, though not enough, This therefore I may compare to the Body of Phyfick, as Philosophers compare Man to the World, a Microcosm, whereby as in a Glasse every essential part of Physick is seen to be composed; An Artist may behold the threefold conjunction of the parts of Man to contain the Soul, Body, and Spirit: The fame congruity is couched in this Occult Physick (viz.) Magical, Physical, and Artificial, which is a compleat Body of Phylick; the right understanding of which, is only by those that contemplate the Heavenly Bodies, and their Influence on TerrestrialEssentials. Therefore Dear Friend, let Ignorance despise thy Labour, and spare not: But Wisdom is Justified of her Children , and they rejoyce to fee their Mothers Face to shine. Therefore Dear Friend bring forth of thy store things both New and Old, and be not weary of well doing.

So Prayeth thine in all Affection

John Goodes,

Student in Aftrology.

To the Ingenious Reader.

T Have for the Publique good attempted this Antient and moft Honous Irable Sabjett; the publishing hereof, will subject my pains, and this long Experience to the common Censure of all mens Opinions ; but knowing that the tafte differs according to the predominating humour in every one (viz) fome love the fowr, fome love the fweet, fome the bitter, fome the falt : So I doubt not but there will be some amongst the most Sober that will accept of this small Fabrick, wherein they will find many fecret Clofets, in which are lockt up many pleasant things both for the Difeafes of Body and Mind , if you have the right Keys hereof, (viz.) the understanding of the matter berein contain d; to which purpole, read with pleasure the third Book. Having no place to descend to particulars , I fhall defire the Students in the first place to Correct the Errataes, which I hope are not much material, but will admit of

an Excufe.

Secondly , Let Practicioners underftand , that the bigheft Dofe is fet down in many of the Purging and Vomiting Receipts; therefore let them be administred in the Dose according to the Age and Strength of the Pattent and Humour offending, and fo thou fhalt do well. Reader, the building is but |mall, therefore it would be very improper to add more to the porch bereof , but thou art defred to walk in and detiebt thy felf in the best Rooms , and if thou findest any thing therein that pleafeth thee , thou art to take it for thy venture; I fall only add in this place a Medicine Compound, of great effett to keep the Body in bealth, and the Humours from Putrefaction, it is good against the Fume, of which Difease you will find in the second Book; its Dose is from five draps , to fo much as will make a draught of Ale, or other convenient Liquor Tart : it keips down the Vapours from the Brain , in freating and faint walkings, it's to be used sometimes, and only in Summer time. Take Oyl of Vitriol, and Tincture of Saffron , of each two Drems , Syrup of Red Poppies, a few Drops , to bring it into a Balfomique Body. This I shall give to the most Honest and wife in this Art to judge , if it be thus taken , whether it will not prove as I have faid : nay and much more effectual, than many others.

Now if thou Shatt accept hindly of what I have done , thou wilt give me cause of higher thoughts; but this I will affure thee, in what I bave done, I bave been as faithful as it is possible for a mortal Man to be. So I (ball referr thee to the Work it felf, and (ball wait an op-

portunity to jerve thee.

Book I

OF

BEASTS

And their Phytical Vertues,

Of the Elephant.

He Stones of an Elephant dryed, and hanged about the neck of a Woman with Child, causeth speedy and easie delivery. His Pizzel dried, and worn about the neck, cureth an Ague.

Of the Unicorn.

The Hoof of the Unicorn is better than his Horn, and being worn about a man in any place, no infe-

The hro

Vou

ction can have power on him; yet the Horn is very pretious alfo, and being fo worn, it cureth the Falling fickneis.

Of the Bever.

a're the tongue of a Bever dried, and now and then and I smell unto it, and it will cure the Apoplexy. And the Stones of the Bever dryed, and so much of them as a hazel Nut scraped in Vinegar, and so steeped 24. hours, then put the Vinegar in a dish upon coals, where ir may vapour, and the fume thereof being taken into the nose and mouth, doth cure the Alegrem, and all Ve pains of the head; also it cureth the Mother.

Of the Mole or Want.

The bones of a Dog Want sewed up in filk, and worn by about the neck, caufeth a woman to conceive.

Of the Badger or Gray.

Take the blood of a Grey new killed, and wash your ed hands in it, and smell to it, and it will cure you of the dia Squinancy. It cureth also Scabs and Itch.

Of the Hare.

The Heart of a Hare dried, and worn about the neck, it li cureth the Cramp, and drunk in Wormwood-water it be cureth all the Worms in the Stomack or Belly.

Of the Marten.

Take the skin of a Marten and burn it, then take the shes, and steep them in White Wine, or Water, and hrow it upon an Adder or Toad, or any such like worm, and they shall die immediately.

Of the Tortoife.

Take the shell of a Tortoise Egge and wear it about you, and all that while you shall never have desire of Venery.

Of the Camel.

The hair of the back of a Camel burned to ashes tops all bleeding presently. Also his Teeth being worn by a woman, makes her to have her natural Courses.

Of an Affe.

The Tongue of a Hee Ass that was gelded, being dried and worn about the body, doth stop bleeding immediately, causeth a wound to sodder and cloze very strong.

Of the Hedge-Hog.

Take the skin of the Hedge-Hog, and let it be made like a night-cap with the prickles, and put it on the fick bodies head, that therein is pained, it will procure him ease, and make him sleep well.

Take a great Toad, kill him, and put him into a Hors Dunghill, there let him lie, and the Ants will consum W the flesh; in the head you shall find a thing like a stone or great or little, the which being fet in Gold, and wor in about a man, it doth give him warning of any mischie or ill to him that weareth it, by changing colours in di ha vers manners.

Of the yellow Frog.

Take him, and cut off his head and dry it, and being worn about a man or woman, it caufeth the party extreamly to fleep; it also settleth the brains of such as are light headed, but it maketh the party Spur-blind fo long as it is about him.

Of the Otter.

Make gloves of his skin, and being worn, it healeth as the pain of the Gout in the hands, and taketh away the le Cramp from all parts of the body.

Of the Hart.

Take the Horns of a Stag in, a velvet head, and fcrape off the skin or vitm, and dry it to powder, and being worn by awoman in Travel, it causeth speedy delivery. It is a very wholfome thing to be taken inwardly, it killeth all worms, and cureth the Spleen and the Mother it purgeth the Liver, it Roppeth the flowing of the seed

ed

th

th

C ł

1

Seed. The Dose is one dram in white wine.

The Horns of a Stag killed in October, and being dryed, one dram thereof taken doth cause one to vomit.

The Horns of a Stag in May have strings much like m Worms, but are not Worms, yet let them be Worms ne or not, dry them to powder, and drink a drain thereof on in Muscadine, it killer hany worms in the body to what.

The bone of his Heart being worn about one who di hath the Falling fickness, cureth himin a short rine. It cureth the Passion of the Heart, and is a very wholsome thing. And being taken for a Funce, doth cure the Mother, and the sume of it purgeth also

A genera! Medicine to be made of the Stra od 19

Ake of his Horn finely scraped one ounce, of his vilms of his velvet head half an ounce, of his Brains dryed, best in October, balf an ounce, of the bone of his Heart one scruple, of his Pizzel, being dried, three drams, of his Hoof four drams; put to this one pint of white Wine, then boil it in a close Decoction, after that distil it, when burn the Feces, and make thereof a Salts and put that Salt into the Distilled Water. The Dose is half an ounce.

This worketh all the Effects aforefaid, and is good

for many Diseases more.

Of the Row-Buck.

and other ill make his

Take the Horns of him and make Beads thereof, and wear them about your neck, or wrifts, it causeth conception. And if a man weareth the same, he shall not have his natural course of Seed, though he lie with a woman.

B 3

b

Of the Lion, Nothing of good observed.

Of the Civet Cat.

The skin being finely drest and made into a Stomache and worn, it expelleth all pains from the Heart imme diately; and being bound about a womans Thighs, cau seth speedy delivery.

Of the Squirrel.

Take his fore teeth and wear them, and you shall ne yer be troubled with the Cramp.

Of the Water Rat.

Take his skin and dry it, and dress it as a Furre, and being worn about a woman it cureth the Mother. His bones beaten to powder do the same thing being drunk. And it stops the Urine of them that have no Retention, and whose water goeth from them by day and night.

og at Las Lord Of the Viere.

Take a live Viere, and geld him, take his Stones, dry them to powder, and lay them on the breast of a man when he sleepeth, and it will make him dream fearfully, and to groan and weep. And if it be drunk it cureth the Whites in man or woman. he

ne

au

Of the Dog Fitche.

Take a Dog Fitcho, and roast him with his belly sull of Cumminseed, and take the grease, which will not be much, and put it into a little Box, and sew it in a piece of Silk, and wear it about the Neck, and no insection can take hold on you.

Book II.

This Book treateth of the Nature of Trees, and first of the Cedar Tree and his Vertues.

Ake a Salt of the Cedar Tree, and give a dram in broth, and it will cure the yellow Jaundice, and the running of the Reins also, being made with the spirit of wine.

Of the Lignum Rhodium Tree.

The Lignum Rhodium if it be graffed with a white Thorn, it will bear a fruit like unto a Goard, but no bigger than a Wall-nut; that fruit being worn about a woman causeth conception.

Boyled in water and then dried to powder, and drunk

in white wine, it cureth absolutely the Stone.

Of the Virre Trees

Take the Rinde of the Virre Tree roots dryed, and worn about

bout the neck, it cures the shaking of the head and Megrim. The Salt of this trees Berries being drunk in white wine cureth all inward Ulcers, and forceth the Imposshumes to break outwardly. It cureth the griping of the Belly, and scoureth the Reins. They must be gathered in June, July, or August; and this Salt must be mingled with three or four grains of Bezar. The Dose is one dram with the Bezar in white wine.

The Pine Tree Mills allig and bons

The Pine Apples being gathered when they are full ripe, the kernels being worn by any, the faid party shall have no Lice about him.

The same do cause a Woman to have her Terms. The sale of Pine Apples is an excellent Medicine for divers things, especially for the Stone and Strangury.

For the Gout.

Take green Pine Apples from the Tree, fix of them, and powder them, and put to them a quart of the spirit of Vinegar, one pint of Sallet Oyl, boyl them exceeding well together, then strain it, and let that water stund twelve hours, then take off the Oyl from the top, then put to the Oyl one spoonful of the juyce of Wormwood, and of the juyce of Rhue one spoonful, the juyce of the strongest Tarrow one spoonful, four spoonfuls of Honey, two ounces of wax, two ounces of stone Pitch; Boyl all these together till it comes to his height for a Sere-cloath, the which apply to the Gout, and it will immediately take away the pain, and dissolve the knobs.

Maril

k

t

Of the Orange Tree.

Take the leaves of the Tree and earry them in a little bag bound to the Navel, and it will cause a woman speed by to conceive, and also to keep in the conception of child. The same leaves powdered and drunk in white Wine cureth the Green Sickness, and stoppeth the over slowing of the Seed. The juyce of Oranges pounded and the pills distilled is very good for the Stone, with Fennel seed, Pasley seed an ounce, of Dill seed half an ounce.

Of the Nutmeg Tree.

Take a Nutmeg that hath the Mace on him, and few it in a linnen bag, and bind it about a womans Leg, and fuch another to the Navel, and it will cause het speedy delivery. It will also cure the Squinance if it be worn about the neck. The rind of this Tree boyled in fair water and drunk stopeth all kinds of Fluxes.

An excellent Medicine for the running of the Reins, the Whites in momen, all Fluxes, the Green Sickness.

The of Nutmegs pounded half a pound, put to it one quart of Sack, one pint of Slow water, boyl this in aclear Decottion, then strain it, then put to this liquor one ounce of Cinnamon, rinds of Pomgranates one owner, Mane one dram, boyl it again, and strain it very band, and give three spoonfuls of it warm, and it will sure the faid Difactor.

Of the Pamegranate Tree.

Take the juyce of a Pomgramme, and one part of the kernels, and of Rose water two parts, and pur it together, and give it to a young Child who sucks, being sweetened with sugar, it doth sumly knit the Navel and keep him from a Rupture; but thus said juyce and ingredients must be first twice distilled.

An excellent Medicine for a Rupture in who belly of alder young.

Ake one pound of Pomegranares builfed winds and all, and put to it white Wine one quarte. Plumine maner one pint, earth-Nuts a quarter of a pound, Bonesone Roots, and Salomons Seal, of each one quarter of a pound, if you cannot have these last roots, then put in a quantum of a pound more of Bonewort Roots, and add to it one pint of Rosse mater, both all these in a close Decoction, and after what dissibility in Balneo; and this doth cure any Rupture. The Duse is some spoonfuls.

Of the Balfamum Thee.

The Rind of the Balfamum Tree is of great force, for being worn about the Neck, it makes a man blind to fee again, so that the eye be clear and full. It takes a way a Pin and Web in the eye in communicy of time.

An excellent Medicine for the Drapfre.

T Ake four ounces of Balfamum, and put it into a skiller, and put to it one ounce of Diagnostium, Rheuburk in ponder

S

powder half an nunce, Catapasie in powder ten grains, Gum Dragon half an onnce; mix these together, and boyl it to a height and it will make Pills. The Dose is one scruple. This will give ten of twelve stools to any one that have a Dropsie, and will cure it absolutely.

Of the Lemmon Tree.

Take a green Lemmon and wet it in Wine Vinegar, and lew it in a bag, and bind it to the nape of the neck, and immediately it stayeth bleeding. The juyce of Lemmon being dropped in a green wound, dorn immediately stop the bleeding.

Take the juyce of Lemmons and distil it with Coppetas, equal parts or weights, it maketh a Water that will cure all wounds, it purgeth the Liver, and purifieth the Blood, it cureth the white Scurf, I mean the juice of

Lemmons dorn this.

A Medicine for the Gout.

Ake a Lemmon and bruise it, and put to it a little Vinegar, that is, one spoonful, and one spoonful of Neats-foot oyl, four spoonfuls of Wheat slower, one spoonful and an half of oyl of Tartar, mix all together in the form of a Pontice, and apply it to the place, and this will take may the pain in three hours.

Of the Sassafras Tree.

This is an excellent Tree, and of divers Vertues, his Magical Vertues are by his finell, and that is for the Megrim, and fuch like pains of the head, and most excellent

cellent against the falling Sickness. The Decoction of Sassafras is a great dryer, it cureth the Rheum; the Salt of it is a very excellent thing for many Diseases, but especially for Morbus Gallieus,

The Dose is half a dram in Butter to be taken in a Pill

or two.

to

le.

at

For making the Salt thereof the Rind is the beft.

The First Medicine of Saffafras. The

The one pound of Sassafras thin sliced and dried in or Oven, then beat it to powder, and take as much Nummegs made into powder, and mingle both together, and in the morning fasting, drink it with a little Ale, it cough the Cough of the Lungs, and the Ptysick, and it is an excelent opener of the Stomach. The Dose is one dram.

The second Medicine of Saffafras.

T Ake one pound of Sassafras made small, and put to a pottle of the best Sack, and boyl it in a close Deco-Etion, then strain it, and put to that liquor China three ounces, I singlass two ounces. Pomegranate Rinds two ounces, Annifeeds one ounce, Liquorice and Cinnameh two ounces, boyl this again in a close Decoction, then distill it is the strongest Balneo. The Dose is four spoonfuls. It cureth the Rheum or Pox, and stoppeth the Running of the Reins, the Whites in Women, scource the Kidneys, and is good for divers things.

Red

11 3

2 27 he

Do

cl a

The third Medicine of Saffafras.

Ake a pound of Saffafras made into fine powder, and put to it of Angelica and Fennel half a pound, Rheubarb an cance and a balf, Diagredi half an ounce, Senna two ounces, Polypodium two ounces, Epitamy and Sticadoes one ounce, Annifeed and Fennel feed two ounces, and put to all these three quarts of Rose water, then boyl it in a close Decellion, then frain it, and put Sugar to it, and make An thereof a Syrup. The Dose is three ounces. This is a good Purge, especially for the Pox, Dropsie, and divers other Difeafes.

The Salt of Saffafras cureth the Pox, the Inflammation of the Liver, the Stone Pox, or Pock of the Lungs; it is excellent for the Stone, being diffolved in white Wine, and cureth the Piles and Hemorrhoids the place being washed therewith; also it cureth telers, Pack fores, Cankers, Fistulaes; Botches, and especially a Noli me tangere. The Dose is

from half a Dram to a Dram in white Wine.

Of the Yew Tree.

The Berries of a Yew Tree dryed, and worn in a little big about the Neck, doe help the trembling of the art, and is good against the Kings Evil, and stayeth bleeding at the Nose; one dram of the powder of them being taken in drink doth flop Fluxes, the Running of the Reins; also it cureth the scalding of the Urine:

Ake the Salt of the Yew Tree, and put it into an Oval. Glass, and put to it the spirit of Vinegar, an equal proportion of each, then fet it in the strongest heat for four days,

pen take it forth and dissolve it in the spirit of Wine, then of litto a Salt again, and then it is an excellent Medicine or divers Diseases, especially for the Pox, the Leprose, the Redness of the Face, burning of the Liver. It also easeth all pains, it hath a purging quality by avoiding Urine, is is a great enemy to the Stone in the bladder, cureth Ulcers in the Tard, and is a great preserver of the Kidneys. The Dose is half a Dram in sweet Wine.

An excellent Medicine for the fretting of the Guts, and to kill Worms in the Stomach and Belly.

The one pint of new Milk and boyl it, then take off the Cream, and put one dram of the falt of the Yew Tree to it, and add two drams of Manna, and of Mummia half a dram, and drink a good draught of it.

Another for the Leprosie.

Ake a Bath of the Yew Tree only in common Water, boyl it, and put it in a Tub for a dry Bath; this sweat doth cure the Leprosie and the Pox, and maketh the body clean, cansing the Scabs and Scurff to fall, and the very skin also to pill and fall off, so that it cleanseth the whole body,

Another.

T Ake the grounds of Ale seven or eight Gallons, and put it into a large Kettle, then take six pound of the Tem Tree leaves and cut them small as herbs to the pot, and put it into the said grounds of Ale, then put into it three quarts of the strongest Vinegar, two handfulls of Bay Salt, boyl this well together, and when it is so cold that a man may suffer

into it, and so sover him closs, and let him sit there an ho all or two, it will soak and take away the pain of the Gout, and dissolve the said knobs, and take away all the aches of the Legs; it will cure the Megrim, and all the pains of the V. Head; it maketh women have their Courses, if they cover it with a Sive, when it is very hot lay cloaths on it to keeped the feet from scalding, so cover them all round and sweat well.

Of the Lime Tree.

Take a piece of a fingers bredth of the bigness and square of the timber of this Tree, and if any one be hard to or bleed on the Nose, write his name on one side of the stick, and on the contrary side the Character of O. R. then burn the slick, and it ceaseth bleeding immediatly.

His leaves being gathered in the bud and distilled, make an excellent Medicine for the Strangury, and Con-

fumption of the Kianeys.

An excellent Medicine for a burning Fever

Ake a postile of the water of Lime Tree, and put to it four ounces of French Barley, boyl it in a close Decettion very well, then put to it a quart of new Milk, of Borrage leaves three ounces, of Strawberry leaves three ounces, of Dandelyon, and Milk Thistle three ounces; boyl this in a close Decoction, then distill it in Balneo. The Dose is three spoonfuls.

Of the Quickbare Tree, or wild Ash.

Take a cluster of Quickbane Tree berries green, and convey

and then examine her, and she shall confess.

Pound the same berries and strain them, and give them
the coany beast or man, that is overseen by a VVitch or
the VVitchcrast, and it helps them.

Take a cluster of the same berries, and hang them a-

Farcy or Fashons.

Take three ripe berries of the said tree, and pound them, and give them in white VVine, and it doch absolutely cure the yellow Jaundice.

The first Medicine of the Salt of Quickbane Tree, Or

Ake of his Salt half an ounce, and put to it three ounces of the spirit of wine, and dissolve it therein, then nip in a glass, and set it on the fire until it comes to his rody of Salt again, then he is well.

The Vertues of it.

Being taken in white VVine, it doth take away the pirits or vapours, it provoketh sweat, but not much; it stayeth absolutely he Running fof the Reins and VVhites in VVomen; t purgeth the Liver, and is a great opener of the pipes; and most excellent for the cough of the Lungs, and hath livers other vertues. The Dose is Dj.

If it be mingled with the liquor, or water of Honey, t dissolveth Gold, Silver and Coper, and makes them Medicinable, and excellent Physick; for by them he is enriched in virtue. The which three Medicines shall y tere be laid down.

a

Ake one pound of Honey, and add one pound of Oy of Olive unto it, and beat them well together, then put it into a Still Body, and distil in the greatest Balneo, then pant the Oyl from it and keep that water.

Then take of that water one ounce, and of the Salt of Quickbane half an ounce, then take one dram of Gold and make it into small parts, and in forty eight hours it will

diffolive.

Then take that dissolution and put it into a Still Body fit for the purpose, then distil it. This water you must keep up try preciously. The Dose is one Drachm in one spoonful to of white VV ine.

have done with Gold. The Dose of them is two drops of

either of them, which is a double proportion.

And now here followeth the Vertues of the first Medicine of which is the Medicine of Gold.

This Medicine of Gold is very excellent to be given to any man in a Consumption, for if it be possible that he can be recovered, this will recover him in such short time, that he shall find present ease. It taketh away the Redness of the Face in fix or eight times taking, it pur geth the Liver exceedingly; for it will make bitte qualmes of water to come over the Stomach; it is great strengthener of Nature, and preserver of the Kidneys.

The Vertues of the second Medicine, viz. Of Silver.

Take two drops of it in white VVine, it is a prefer

of

remedy for the Strangury, and taketh away the scalding of by the Urine, it healeth any wound, but especially being hurt in the body; and so doth the Medicine of Coper, an especially for an inward wound, and it is most excellent for the Rheum.

But this Medicine composed of all the three in one is

incomparable, which is this,

vill Ake one Dose of Gold, one of Silver, and one of Co-I per, and put them all together into three spoonfuls of ve white Wine, and it doil cure all the Diseases aforesaid ful more effectually than one by one.

you Of the Prickwood, or Dog Tree, otherwise called the Squirrel Phylick.

For, when the Squirrel is fick or bruifed, he repaireth presently unto this Tree, and he will back it, or eat of the berry, the which will purge him, and so he recovers his health.

Take of the Berries thereof dried, and wear them about you, and for two hours at that present they will provoke you to fleep, but it preserveth one from the Falling sickness, that whosoever hath this about themshall not fall.

Take two ounces of the Berries and boyl them in white VVine one part, and filter it, and give one spoonful thereof, it cureth the Stitch and Spleen immediately, it cureth also the growing of the Melt, it cureth the Dropsie, it purgeth and breaketh VVind, it stayes the VVhites in VVomen, it is good against the Stone, it purifieth the Back and the Kidneys, also it cureth the Pox affuredly.

For

For the Dropfie.

The the Rinds of Prickwood Tree one pound, and pomder it, then boyl it in four quarts of white Wine, Cinnamon four ounces, Senna two ounces, Rheubarb half an ounce, boyl this again in a close Decoction, then distil it in the strongest Balneo.

Then put to this distilled water of Liquorice powder one ounce, powder of Anniseeds one ounce, drawn Cassia one ounce, Helleborus Albus one scruple, boyl this again in a

close Decoction, then distil it again.

The Doie to a weak body is half an ounce, and to one that is strong one ounce. This cureth all the Diseases before mentioned.

Of the Service Tree.

The fruit of it dayed and worn about the neck stoppeth bleeding, it causeth a woman to keep her child, and earen green it is a very wholsom fruit for women with child, it will make them go out their time, except it be by some great accident, but the party using this same must refrain from VVine and much strong drink.

The water of this Tree is excellent good for the Strangury, and all inward bruifes, it is a great focurer of the Kidneys, it is a great enemy to the Stone, it opens the conduits of the body in all parts, it cureth the yellow Jaundice, it helpeth fore breafts, it is most excellent for a Fistula and Canker.

The

The Medicine of it is this.

Ake one pound of the fruit pounded, and put to it one quart of Sack, and distilit in Balneo, and put to it Galangal, Fennel seeds, Liquorice and one ounce, Cinnamon two ounces, boyl this in a close Decoction, and distil in Balneo.

The Dose is one spoonful. This worketh all the effects aforesaid, and is an exceeding wholsom remedy for

wind, especially in the small Guts.

Take the juice of Services, and annoint the Piles and Hemorrhoids therewith, and it cureth them in twenty four hours.

Of the Peach Tree.

Take the Peach when it is half ripe, and dry it in the Sun, then steep it in Vinegar three days, then make it hot on a chafing dish of coals in a Sawcer, and as hot as the party can suffer it, bind it to the Navel of a woman, it will cause her to have her Terms, and also to conceive. The distilled water of the Peaches, or of the seaves, is very excellent against the Fevers, hot Agues, and Pleurisses. The Dose is one spoonful or two.

It purgeth the Liver and Blood, it stoppeth the flowing of the Seed if it be gathered in the blossoms. It be-

ing diffilled cureth the shaking of the joints.

The Medicine of the Peach.

The of the young shoots of the Peach Tree when they are soft, and also of the leaves, and distil them, Then B ?

take three pints of that distilled water, and put to it Cinnamon one pound, then distill again. The Dose is one spoonful.

This doth all the effect before mentioned, and it killeth worms also; it is a great opener of the Stomach, and a great purger of the Liver; it is excellent against the Strangury, and the scalding of the Urine; and good for divers other things which in your practice will be seen.

Of the Stow Tree.

Take green Slows and steep them whole in the Oyl of Spike 24. hours, then take them out and dry them in an Oven, then steep them in that oyl again, and so let them remain in it, and keep it in a Gally pot. Us. Take three of those Slows, and bind them to the Navel, and let them lie 24. hours, and it will assuredly stop the bloody Flux.

Boyl green Slows with the Oyl of VVormwood, the Navel being annointed, and the Stomach therewith, it killeth all the worms in man, woman and child.

The Medicine.

Ake of the water of distilled Slows one pottle, add one pound of French Barley, and let it steep two days, then strain it; put to this Liquor half a pound of blanched Almons, a quarter of a pound of Liquorice; Boyl this in a close Decottion, then distil it in Balneo. The Dose is two spoonfuls.

This doth stop all Fluxes, and is a great restorer of Nature, it is also a great opener of the Conduits, and United Stories.

Book

A very strong Vinegar.

This Vinegar will work upon the metals very frongly, it is otherwise called Acetum Radices.

Take green Slows before the shells of the stones be hard, and pound them and strain them, then distill that Liquor in the strongest Balneo, and put to it the like quantity of Slows as before, being bruised, then put it into a close vessel, and boyl it in a close Decoction, then distil it again in the strongest Balneo; and of it receive three waters, the sirst is the stoongest, and keep it in a stone vessel. This is a most excellent Vinegar, and will work upon metals very strongly, the Feces of it will make an excellent Salt, which is very binding for Fluxes.

Of the Mandrake Apple.

The Mandrake green Apple being worn about the neck of the party that hath a VVen, even as the Apple doth wither, so shall the VVen.

The Mandrake Apple is the coldest Apple or fruit that is, and provoketh sleep, so that the juyce thereof drunk in white wine, the party shall hardly be awaked.

The Medicine of the Mandrake Apples.

The six or seven M indrake Apples, and put to them one pint of Vinegar, boyl them in a close Decoction, then pour away the Vinegar, and crush or pound the Apples to a pulp, then put to it one pint of strong Aqua Vita, after that distill it in Balneo. The Dose is one deachm.

C 4

moderate fleep; it causeth women to have their Terms; it is also good for divers other things.

Book

4

Book III:

OF

HERBS

With their Magical and Phyfical Vertues.

Of the great French Mallows.

Part II.

First of the Diseases of the head and its temedies, and so gradually through all the Diseases of the Body.

First, black Rowls to purgethe Head by the Nofe.

Ake Daisie leaves and roots, Bittony, of each six ounces, Pellitory of Spain three ounces, of the juyce of Pellitory of the wall, and Germander, of each one ounce and a half, Primroses the juyce two ounces, Flower-de-luce three ounces and a half, pound all these very small, and seeth it in a pint of Water, then press it and cast away the Feces, then take Sal Armonick three grains, white Hellebore nine grains, Bay Beries 5. Pepper Corns 9. Cloves 3. Cinnamon 15. grains, Turbith

Turbith one dram and a half, Agarike 3j, Dlagredii 3jj, make all these into sine powder and searce it, with 3j, of Epithemum searced, then add Honey the weight of 18 d. Olibanum 17 d. Mastick 15 d. and boyl it to a thicknesse for Rowles, it will keep good seven years.

For Deafness, first purge the head with Rowls made fit to put into the Nose, and then make this Medicine fol-

lowing to put into the ears.

Re Stone Pitch 3j. Rossen, Turpentine and Wax, of each 3/s, Barrows grease 3j, Frankincense 3j, Mirrh 3j, mix these all together and stir it well, and let it come to a ptetry hard Salve, then make it into little Rowls to go into the ears, and sew a fold of a linnen cloath about it in manner of Teat, with a thread well fastned to one end, to draw it back out of the ear, and you shall have it draw corruption as our of a wound about the Tent, and annoint the brims of the Ears every day with it.

Against the Head-Ach.

Re The Herb that groweth upon the Head of any Image, and it cureth the Head-ach by its Magical Vertue.

Against Wind in the Head.

Re Wheat Flower one pint, Sigir one pound, Rose water one pint, Bittony powdered, white Amber, Sker-rer Mores, Anniseeds, Carraway seeds, Piony seeds, Cinnamon, of each 3j, Elicampane 3ss, mixall these together to a paste, and if the water be too little add more, and make this into little cakes of an ounce a piece, and

de

of is

of

M all

lik

take fine Sugar and lay under them in a paper, and turn them, and do with Sugar as they do with flower and then dry them in an Oven, and keep them as you de ga your dry sweet-meats, and eat one in the morning, an another at night, as you find your felf opprest wit g wind.

Another against the wind in the Head.

R. Potatoe roots one pound, pare them and boy them in white Wine, and Rose water, of equal parts til the they be fost, then beat it in a Morter to a Pulp, Wheater Hower and Sugar half a pound, Carraway feeds fearced 31/s. Anniseeds searced, if it lack moissure put more Rose pa water to it, and make cakes of half an ounce or an ounce weight, and dry them in an Oven, and eat them at all times.

Against any pain, or dissinesse in the head, and to provoke fleep.

First purge, then sweat in a bath of hay and falt, as ter that apply this Plaster on both sides the remples and bind it fast.

Take Nurmegs 31, White Poppy feeds, and Dill feeds of each 3j f, beat all to a fine powder, and mix it with the oyl of Spike and make it to a paste, and make Cakes of it as big as a shilling, and at Night apply them to the temples. Praise God for this.

To Provoke fleep.

Take Laudanum two or three grains, make it into ga a pill, and give it at night going to bed in Marmalade,

or the pap of an Apple, and drink burnt Sack alone with sugar after it, and then lie down to rest, it mirigates violent pains, it keeps down the sumes that trouble the brains in seavers, but give it not in the beginning of a seaver, lest the patient sall frantick thereupon. Labdanum doth the same.

Another to cause sleep.

Take the pill Stirax and give it as the former to those that cannot sleep for Coughing, or are troubled with defluxion of Rheum, it provokes sleep, and easeth the pains of the stomach. The dose is ten or fifteen grains according to the strength of the patient.

Against a Rheum that troubles the teeth.

Take Salendines, either the root or Halk, and scrape off the rind, and put it into the ear on that side the pain is, and it will help.

An excellent Medicine to cleanse the teeth by around Rowl like a quill.

Take Hysop, Organie, Mint, of each, 3,1, Harts horn, and common salt, of each 3,1, Calcine these together, and of Pumice stone, Cinnamon, Pepper of each 3, Mirrh 3,1, Laudanum and Storax of each 3, Musk three grains, Calcine the first five, and then grind all together on a marble stone, and make it into Rowls like quills to rub the teeth with disolved Gum Dragagant in Rose water, and so made into rowls, or quills, and it will be as hard as a stone, it will keep the

the Gums from purrefaction, and make the Teeth ver

A Nettle bruiled betwixt the fingers, and put in

hollow tooth cures it.

Against the shaking Palsey.

Take the bone of a Fox pizzell and dry it, then take Civer one dram, and disolve it in Rose water, then steep the bone in it, and dry it again, then sew it in silk, and hang it about the neck, and it cureth the shaking Palsey in man or woman if under fifty years.

Against the falling sicknesse.

The bone of a Fox pizzell being worn by those that have this disease, it cureth them, or the disease shall never have power so long as it is worn by them.

To take off hair.

Take Passey water three ounces, the lesser Spurge, wild Catapusie in woods, of its juice half a pint, as much spirit of Sack, Tartar an ounce, whole Time 3ij, Or piment 3jjj (or Realgar) and distill it and wash the place, and it will come no more.

The same medicine more enlarged.

Take Passey-water Zjjj, of the juyce of the lesser Spurge that growes in the woods, and spirit of Sack of each one pint, Tartar Zj, hot Lime Zjj, Orpiment Zjjj (or Realgar)

ic a

Realgar) add to it of long pepper 3 ji of the juyce of pellitory of Spain roots 3jj, of the juyce of Lemons 2, boil this, then strain it (or which is better, prese it) and boil it to a thicknesse for a plaster, first wash and bath the place with Aqua vitæ to take away all the filth and sweat, then lay on the plaster at night, and in the morning wash the place, and it will be gone.

To dry up the humors of a red Nofe.

Take Sage one handfull, Wood-bine leaves, Rosemary, Lavender cotton, wild Time, Hysop, of each half a handfull, Tobacco, Senneycle, Vitriol, Rochallum of each 3j, Valerian 3j, put unto this of Plantane water, Ribwort-water, Hysop or bramble water of each half a pint, Cinnamon-water one pint, boil this in a close Decoction, then distill it in the strongest Balneo, and so with this water wash it two or three times a day.

Against heat in the face.

Distill on pottle of new milk from the Cow, and put to it, Burrage leaves, Bugloss, and Liver-wort, of each Zijj, Violet leaves Zijj, Setwell and Colombine of each Zij, boil all in a close Decoction, then distill it again. The Dose is Zij, first and last.

Against the Rednesse of the face.

Re Coral 35; Leaves of Gold 31, Terra Sigillata 3:15; Saffron 35; Methridate 31, of the strong spirit of Vinegar

negar 3jjj, nip all this into an oval glasse, and Calcine ir; and when it is throughly Calcined, take it out of the glasse, and grind it one a Marble stone, and keep it for

your use.

Then take Bezar 3/5, Galangal and pearl, of each 3/5, Stibium 9/6, Rhet barb 9/1, white Sanders 3/5, nip this into an oval glasse, and set it into the strongest heat of your Stove till it be Calcined, and after it is Calcined take it out and grind it on the stone.

Then take the first part, and put unto it one pint of the spirit of Sack, and so let it insuse for your

use.

Then take of the Salt of Tobacco, and Pimpernel, of each 3i, of the Salt of Liverwort 3jjj, of the Salt of the Feces of my Cordial water 3jjjj, grind all these together on a Marble stone, and put to it a little spirit of Sack, and set it to disolve, and when it is throughly disolved, put it into the former, and put all into a Still body, or Retort, and distill it with a strong fire in Sand.

Then take the Feces and dry them well, and

that is your medicine, The dose is one scruple.

If you will have it tweat give it dry, if you will have it vomit, give it in two or three spoonfulls of its own water, and it vomiteth very gently, and maketh the body soluble, and it is an excellent thing, as shall be shewed hereafter.

Then take Musk Civet, Ambergriece of each five or fix grains, and put to the water before diffilled in a Retort, and put it in a bag, and there let it infuse in the water continually. The dose of the water is three, four, or five spoonfulls, it will sause vomit very gently.

It

C

and fickness, it is admirable for all swoonings, and for burning fevers, it hath helped them that have lain at deaths door, it stayeth all Fluxes of blood in men or women, it is admirable for Rheumatick persons, it always helpeth the Mother and Spleen, it is good for all diseases, and hurtful to none.

A second water to be made of all the former Feces, after they have been put and distilled together.

Add to the said Feces of Dragon water 3x, of spirit of white VVine one quart, of Liquoris 3j, Cinnamon, Ginger, Cloves, of each 3j, Grains 3yj, Carraway seeds 3 B, Long Peper 3j, Castorium 3jj, then boyl it in a close Decoction, and distil it in the strongest Balneo, and you shall have an excellent second water. The dose is two spoonfuls.

If you will leave out the spirit of white wine, you may put in sead thereof these waters, viz. Dragon water half a pint, Aqua Angelica Zvjjj, Carduus water, as much Ysop water, Scabious water, Orange rinds water, of each Zjjjj, and so shall you have a most excellent wa-

ter for the Stomach. The Dose is two spoonfuls.

A Cordial water called, The Comforter.

Take out the meat of Lemons, and press out the juyce of water out of it, then boyl that pressed water in a close Decoction, then distill it, and of the said distilled water take one quart, and put into it half a pound of Cinnamon, then boyl it again in a close Decoction, then press it again from the Cinnamon; then add to it Li-

Decoction, then distil it in the strongest Balneo.

Then add to this distilled water, of Cinnamon, Li quoris, of each Zij, Anniseeds, Carraway seeds, of each 3 B. Saffafras wood, China, Sanza, Galangal, of each 3jij Eringuish 3v, Castorium 3j. Then boyt this again in close Decoction, and distil it in the strongest Balneo.

Then put to this distilled water, of white Amber, Co ral, Pearl, of each 3 B, Albathoes horn, Harts horn Ivory, of each 3j, Terra Sigillata 3j, Unicorns horn, Ci ver, Musk, Amber-gris, ot each Ajj, Bezar stone Ajj Lignum Rhodium, Lignum Vitæ, of each 3ji, Lignun Aloes 3jjj, Mithridate 3 B. Then boyl all these in a close Decoction, and distilit in the strongest Balneo. dose is one spoonful, and it may well be called My High Esteem.

Then take the same quantity of new waters as at first and put to it new Herbs, and boyl it, and distil it as be fore. Then take new Drugs and put to that distilled water, and boyl it again, and distil it as before in th

Arongest Balneo.

Then take the last Feces of My High Esteem, wherein was put white Amber, Coral and Pearls, &c. and pu your water upon that Feces, and then distil it in th strongest Balneo, and you shall have a very good water The dose of it is two spoonfuls.

An excellent water called My Glove.

Re Rosewater one quart, Broom flower water on pint, Angelica water half a pint, Carduus water, Dragor water, of each half a pint, put unto this Pimpernel feed Zi, Theriacle half a pound, Mithridare Zi, Cordia flowers, the wood of Sassafras, the herb Mousear, d

of each 3j, the feeds or burrs of Egrimony 3j \(\beta \), Octuus Christi 3j, Dates, Cinnamon, Sanza, of each 3ji, Bringuish 3jj, Nutmegs 3jjj, Cloves, China, of each 3j, boyl all these in a close Decoction; then press it, and distil the

liquor in the strongest Balneo.

And keep the Feces of your water, and evaporate it to an Extract; if it be not Still dry enough, then put to that water which you have distilled, Coral, Pearls, white Amber, of each 3 \(\beta \), Albathoes horn, Ginger, of each 3 \(\beta \), of the Buffant his horn 3 \(\beta \), Unicorns horn 3 \(\beta \), Civet, Musk, Amber-gris, of each 3 \(\beta \), Grains, Cartorium, Anniseeds, of each 3 \(\beta \), Lignum Aloes 3 \(\beta \), and add to it of the strongest spirit of Sack half a pint; put all all together, let it insuse six days.

Then put to it of the water of Orange rinds half a pint, then boyl all together in a close Decoction, and distil it in the strongest Balneo. The Dose is one spoonful.

The Vertues of the first water are these.

It doth expell poyson very strongly, it cureth the Plague, it is also a preservative against the Plague, who so taketh a little of it every morning shall never have it; it causeth women to keep their Children, and it delivereth them at their time; it is most excellent against a Consumption of the Kidneys, and for all other Consumptions; it purgeth the Liver, and in time taketh away the redness of the face; it is an excellent Comforter of the Heart; it expelleth the Cramp and Convulsions; it purgeth the Blood and maketh it thin, and giveth it hear and a lively action; its very excellent for all Passeys; it is an universal medicine, good for all Diseases, and hurtful to none.

3

There

There is a second water to be made of the Feces. Put to it of the strongest spirit of Sack, add of the water of Orange rinds, of each one pint, and put it into a stone Jugge, and set it into a hot Dung-hill, and let it stand twelve days to putresse, then take it out, and after good cooling boyl it in a close Decoction, and distill it in the

strongest Balneo.

Then put to that distilled water of Cinnamon 3ji, of the slesh of Dates 3j, Castorium, Anniseeds, Fennel seeds, Carraway seeds, Ginger, Grains, of each 3j ß, Nutmegs, Cloves, of each 3ß. Boyl these in a close Decoction, distil it from the Feces three times in the strongest Balneo, and you shall have a most admirable water against wind; which is an excellent Cordial, and a singular thing for divers diseases, as afore is said of the first water. The Dose is one spoonful. It is not much inferiour to the first water.

Then take the Feces of your first water, and it is an excellent purge if you add to it of Rose water, Hysop water, Angelica water, of each one pint, and Rheubarb, Diagredium, of each 3jj, Aloes Secatri 3jjjj, Bdellium, Cinnamon, of each 3jj, of the juice of Milk-Thistle 3jß, juyce of Mallowes, juyce of Bittony, juyce of Mercury, of each 3jj. Boyl these in a close Decoction; then press it, and vapour it to a height for Pills; putting to it six spoonfuls of Honey, or three spoonfuls of Sugar. The Dose is 3jj. This is an excellent purge, and may be given in all diseases.

An excellent water of the Horn of the Buffant.

Re Of the Horn 3j, white Amber, Coral, Pearls, Albathos Horn, of each 3jj, Unicorns Horn 3β, Bezar stone,

d

d

e

f

Hone, Amber gris, of each 3 \(\beta\), Civet, Musk, of each 3\(\beta\). Beat all these into sine powder, then pur to it \(\frac{3}{3} \text{x} \)\) of the purest and strongest spirir of Sack, and let it insuse ten days, then boyl it in a close Decoction, and distill it in the strongest Balneo. The Dose is one spoonful.

This water is wonderfull against poylon.

Then add unto the Feces so much more spirit, and do as before, so do again, and again till you have three waters besides the first, which is four waters, which must be drawn from the same Feces, which is very excellent. Praise God for it.

A most excellent. Aledicine called the second part of the Marygold, which is excellent for the Pox, Plague, Dropsies, Gouts, Sciaticaes, Aches, Palsies, Cramps, Convulsions, and divers other Diseases.

Re Calcined 2 3j \(\beta \), falt of Mercury, of each 3 j, of the filings of Saturn 3 jj, nip all these together into an oval glass, and set it into the strongest heat of your Stove seven or eight days, then take it from the fire, and it will be a hard kind of Metal, then take it forth of the glass, and put it into a Crusible, and lute it with strong potters clay that will not chop; but first put in 3 jj of Vitriol in powder; then blow to it with a strong blast for two or three hours, then take it from the fire, and after it is throughly cold, take it out of the pot, the which you must beat to powder.

Then put unto that powder Terra Sigillara, Chimical oyl of Sage, of each 3jj, Bezar stone 9jß, Amber 3jjj, then grind all together on a marble stone, then nip it into a glass, and set it into the strongest heat until all be dried into a calx, then after good cooling take it out of

we did

For the diseases of the Gall, called the Yellow Jaurdice.

Re The Urine of the fick (his first morning water, and knead it with meal to a Cake, and roke it in the ashes, and there let it burn, and do so again with his water at noon, and at night) and it will first mend his water and make it fair, though it be cruded and never so yellow; and the continuance of the same will cure him abs lutely, although he be at deaths door, assuredly.

Medicines appropriated to infections of the Heart, as Poyson, Plague, French Pox, &c. with several Cordial waters good against the same.

First, a Water against Poyson, and all Infectious Diseases whatsoever that have affinity to the Heart, as the Plague, and such like.

Re A whole piece of the Albathos Horn 3β, spirit of Sack one quart, boyl it in a close Decoction four hours, then let it cool, and take out the Horn, for it is good for other uses, and keep the spirit very close stopped, adde to it seed Pearls and Coral searced, of each 3j, Gold, Crocus Martis, of each 3j, Oyle of Tartar, Oyle of Almonds, Spirit of Vinegar, of each 3j, put all these into a glasse, and nip it very close, and put it into a store or such like strong heat for twelve daies; then after it is wel cooled, put it into the spirit of Sack, also adde Bezar stone 3β, and Terra Sigillata 3β, Galangal 3β, Rew sceared 3j, Unicorns horn ten graines, Rose water one pint, boyl all in a close Decoction, then distill it in the strongestBalneo. The Dose is one spoonful.

This cureth the poylon of Intoxicum at tempus, if

death, but the fooner the better; but if the poyfon tarry long, this water will make the patient fick, but give him more every two hours, and continue it, and at last the patient shall break out in great blisters where it hath taken root, and so all the body over full of sores and scabs like a leper, and it will drive it from the heart, and the party shall recover.

And for other ordinary poyfon it is a present remedy, and driveth all infections of any disease from the

Heart.

Another water against porson.

Take of the Salt of Pimpernel, or of the \$\mathbb{P}\$ of it 3jjj, Balfamum one pound and a half, Mithridate thβ, Saffron 3j β, Opium 3j, Spirit of Wine one quart, Bezar 3β digest it twenty daies in Balneo, then distill it in the filings of Iron or cindets, and ye shall have three waters.

The dose of the first is five or seven drops in Sack, against poyson, The second is three drops in milk, it cureth the Gout, The Dose of the third is nine drops in Mouse-ear water, it cureth all Pestilent seavers. The first water is white, the second yellow, and the third

is a red water.

The former being too hot, ye may lessen the proportion thus, and call it Balzinatum.

Re Balfamum 3jjjj well washed, Mithridate 3jβ, Galangal 3 β, Sastron, and Pimpernel seed, of each 3jj, Bezar stone, and the Salt of Pimpernel, of each 3jj, Anniseeds,

Anniseeds, Carduus seeds, and Liquoris, of each 3j, Teria Sigillata 3jjj, Albothos horn, Unicorns horn, of each 3j, spirit of Wine, Rose water, Scabious water, and Angelica water, of each one pint; boil it in a close Decoction very gently in water in the body that ye do diffil it in, but ye must have a very close cover with a double verge, and then very close luted, you must make a Still body with a close cover of tin for this purpose, then boil it as before in it very gently, and let it cool well before you open it, then put on the head of your Still, and distillit in the strongest Balneo three times from its Feces, after it is distilled put in the Salt of Pintpernel, Elbony, and Carduus, of each 3 jj, The Dose is one or two spoonfuls.

This is an excellent Cordial, and provoketh sweat, It cureth Lues Venerea, it breaketh impostumes from within the body, out into the flesh. Its good for the head. It cureth all agues by fweat, taking of it a little before the fit going to bed, and fweat well thereupon, it never faileth, it hath cured very many, it is generally

a good medicine, Praise God for it.

A second water to be distilled from the Feces of the former, and it is called Balhurmanda.

Put to the former Feces of Hore-hound water, Hyfor water, Scabious, water of each one pint, Nutmegs, Carduus feed, and Cinnamon of each 3j, Galangal, Liquoris, and Annifeeds of each 3 8, Bezar 3ji, Caftoreum 3 B, Terra Sigillata 311, boil all these with those Feces in a close Decoction, then distill it in the strongest Balneo. This is an excellent water, and a great opener of the stomach (and as by experience) you may cure all forts of seavers and agues with it, by taking two spoonfulls when the sit comes, and then goe to bed and sweat well, the more the better. The Dose is two spoonfulls. Praise God far it.

Another water against Poyson.

Re White Amber 3yj, or 3jjjj of the white, and 3jj of the yellow will serve as well, spirit of Wine, spirit of Vinegar, Fumitory water, of each on quarr, Coral and Carraway seeds, of each 3jj, Dates, Galangal, Anniseeds, of each 3j, Liquoris 3jj, Almonds half a pound, Cinamon 3jjjj, Musk and Civet, of each 3β, Amber-gris Dvj, Rose water one quart, and forbear all hot Wines, because of the rednesse of the face.

An Excellent remedy for that Poyson called. Intoxicum ad Tempus.

Rewater of Rew, white wine, Dragon water, of each one pint, put to this Mithridate 3ji, Scabius, Harts-horn filed, Cinamon, Galangal, of each 31, boil this in a close Decoction, then distil it in the strongest Balaneo.

Then put unto that distilled water Sassafras wood, China, Crabs eyes, Pimpernel seed, Spicnel roots, Elecampane, of each Ziji, boil this again in a close Decoction, then distill it in the strongest Balneo.

Then put to that water Crocus Martis, Laudanum, Albathos horn, of each 3 ji, Coral, and Pearl, of each 3 ß, Bezar Rone 3 ß, Vnicorns Dj, Civet and Musk, of each

9iii

of Decoction, then let it cool well, and distilit in

the Arongest Balneo. The Dose is one spoonfull.

If ye put half the quantity of the waters to the Feces, and boil it in a close Decoction, and then distil it in the strongest Balneo, you shall have a second water which is very good. The Dose is two spoonfulls.

Then make Salt of the Feces which is almost as good

as the water.

The Dose is grains three in one spoonfull of the spirit of Sack. This former medicine and water is good for all-most all diseases, as the Palsey, the Pox, &c.

This Medicine following expelleth all Poyson from the Heart, provoked smeat, cureth all Agues, and Morbus, it stayeth the Flux in women, causeth conception, loosseneth the Matrix, and taketh away the hardnesse thereof, it hath also many other Excellent vertues,

Re Peach leaves and China, of each 3j, Cinamon 3ß, Lignum Aloes 3jj, the Albathos horn one dram, Terra Sigillata 3jjj, you must Calcine all this severally, and then take the Calcined substance for your Medicine, then put to it Bezarstone in fine powder 9j, beat all together in a morter, the which keep for your use, then take Pimpernel seeds 3jj, Sassfron, Tormentil roots, and white Amber, of each 3j, Pearls Calcined 3ß, Goral Calcined 3jß, beat all these together, and put thereto one pint of the strongest spirit of Sack, and let it insuse three days, then put to it of the dry Balsamum 3j, then boyl this in a close Decoction, and distil it in the strongest Balneo; and you shall have an excellent water from the Feces, which water and Feces keep for your use; and straige God for it.

is

cle

Be

pu

fo

di

The Dole of this water is one spoonful.

Then take the Feces being throughly dried, and grind them together with 3j more of Terra Sigillata. The

Dose is half a dram in the strongest spirit of Sack.

It is an admirable sweat, it expelleth all poyson from the Heart, it expelleth out of the body all scabs, boyls and botches. It is an absolute medicine for the Pox and Leprosie, and provoketh sweat more abundantly than the water. It hath also many other vertues; for which praise God.

The way to make Pills of it, which is the chiefest Medicine.

Re All the former Feces, and add to it of Rheubarb, Diagredii, Bdellium, of each 3j, Castorium 3jj, Cassia extract, Manna, and Polipodium in powder, of each 3β, Catapusei seed, Cinnamon, and Anniseeds, of each 3jj, Honey six spoonfuls, Rose water half a pint; boyl this in a silver Still to a height for Pils. The Dose is 3jj β.

This is an admirable purge, and a most excellent

thing, to which God give his bleffing, Amen.

An excellent preparation of Terra Sigillata, that you bay at the Apothecaries; for there is none so good as this.

Re Terra Sigillata made into fine powder 3jjj, and put to it one pint of the strongest Aqua Vita that you can get, and let it insuse three or four days, then set it on a chasing-dish of coals, and set it on fire, and so let it burn, and when it is burnt as much as it will, put to it more Aqua Vita, and insuse it, and burn it as before, do this three times, till it be all burnt away to the slegm that

will be left; then nip it into an Oval glass, and set it to a art to dry up, and it wil come to be very hard, and in a manner as it were cruded like bay salt, so that there is none so good as this.

The Dose in 3 B in the spirit of Sack; this is the most

you can give; it provoketh sweat very much.

A Medicine to keep the body of man or moman in health, taking this three or four times a week.

Re Milk Thistle water, Honey-Suckle water, Rose water, Ysop water, white VVine, of each three spoonfuls; then add unto these waters Nutmegs 3/\beta, two cloves in powder, Honey half a quarter of a spoonful, Sugar the quantity of two hazle Nuts, Mithridate 3\beta, Sassron 3\beta, Civet two grains, Amber griece two grains, Bezar stone three grains, Terra Sigillata six grains of the purest, boyl all this in a silver or earthen dish till it be thick for Pills. The Dose is 3/\end{a} in three or four Pills.

And let the patient take these when he or she goeth to bed, and this will give a delicate sweat, and if they follow it, they will find great ease hereby, as to many

distempers in the body.

To keep one in Health.

Re Saffron 3 B, Lapis Calaminaris 3j, beat it small, and wear it about thy neck in a bag.

Medicines against the Plague, Fevers, Agues, and the like.

b

Then make this water.

Re French Barley the, foak it in distilled Milk, until it be ready to break, then put it into a common Still and distil it, and put to that water Dandelion, Milk Thissle; Groundsel, Mallows, the Herb Mercury, of each ξή, Vormwood, Mummy, of each ξβ, Manna ξήή, boyl this together in a close Decoction, and distil it in the strongest Balneo. The Dose is three or four spoonfuls.

This disease is soon holpen if it be taken before it

comes to its height.

Then make this Broth for him.

Re A piece of Veal, and put to it common water as you do for any broth, and put to it of Sassafras wood, Orange rinds, and Cinnamon, of each 3 \(\beta \), Pimpernel feed \(\frac{3}{jj} \), Castoreum \(\frac{3}{j} \), Euphorbium \(\frac{3}{5} \), boyl these all together with the Veal, and pour the broth from the drugs and meat (and let him drink it) and cast away the meat, you may cut a manchet or two and boyl with it.

Then to take away the pain of the sides, you shall take a hot loaf out of the Oven, cut it into two parts, Theriacle 31, oyl of Mace, the oyl of Amber which is distilled, or the oyl of Dill 33, oyl of Camomel 33, mix these well together, and then spread some of it upon the loaf as you do butter, and lay it hot to the side and do this three or four times, and it will remove the pain of the side; and it will do the like in Pleurisies.

Against a burning Fever.

Dittil VValnuts one week or two before Midfummer,

and give of that water. The dose is 3/8.

Against an extreme beat.

Re French Barly the β, put to it of Burrage water, Milk Thistle water, Mallows water, of each one pint, water of Groundsel one pottle: Let the Barly insuse herein till it breaks, then pressit, and put to that liquor of the Herb Mercury, Endive, Setwel, Violet leaves, Strawberry leaves, Cinqsoyle, of each ξjj, Polipodium ξjjj, Senna ξj, boyl this in a close Decoction, and distil it in a common Still; then put to this water one pottle of distilled Milk, and drink this ordinarily a good quantity at a time, and this will qualifie the heat of the blood.

Of Cordial waters and their Marvellous effects, and first of Aqua de Novo, or the Calestial Cordial water.

Distil one quart of Spirit from three quarts, or one gallon of white VVine, and put to it of Dragon water, ten 3, Parsley seeds, Cubebs, Peony seeds, Pimpernel seeds. Cartemons, Cardamons, of each 3j, Cinnamon, Figs, Dates stoned, green Oranges, of each 3jj, Anniseeds, Cloves, of each 3jj, Grains, Castoreum, of each 3jj, Silio seeds, Fennel seeds, of each 9j, dried Oranges 3j, Ginger, Nutmegs, Acorns, Calamus Aromaticus, of each 3js, Long Peper 3 \(\beta\), Carraway seeds 3jjjj, Lignum Aloes \(\beta\), insuse all these things in the Spirit of Dragon water three or four days, the longer the better (being first well pounded) boys it in a close Decoction, then distil it in the strongest Balneo once or twice, dry from the Feces.

Then take nine or ten ounces of the strongest spirit of ack, and infuse in it these things sollowing, Mithri-

date 3 \(\beta \), Saffron 3 \(\beta \), Black Albathos horn 3j, Musk five grains, Civet, Unicorns horn, of each 3j, of the East India Unicorns white horn, Buffant or Antilops horn, of the white wood of the India Balsom tree, of each 3j, Corals and Pearls, of each 3jj finely powdered and searced, so must the horns be also powdered and searced; so let all these insuse in the spirit of Sack three or four days, the longer the better.

Then take the first water and put it to this in usion, and then distil it all together again, once or twice from

these last drugs, then it is perfect.

The dose is one spoonful if they be strong, but if they be weak, one spoonful and a half, or two spoonfuls:

The Vertues are thefe.

It dissolveth wind in the small guts, and instantly cus reth the wind Colick, it restoreth Nature decayed, it is admirable for all confumptions, it expelleth all poylon, and all infectious difeafes from the Heart, it cureth all those that vomit up their meat, delivereth women with child, in time of their travel, and encreaseth their throws it frengtheneth and comforteth them wonderfully, and bringeth the After Birth away, and staieth all issues of blood, as their monthly Terms, and caufeth them to go out their full time. It helpeth digestion wonderfully, it purgeth the blood, and giveth Renovation to the fpirit of Life, it cureth the Small Pox, if they be strucken in, it brings them out again abundantly, yea, though they be speechless and sensless for death. It is admirable for a weak young child that cannot fuck, but cryeth and is tormented in the guts with flegm and cold, giving them two of three drops of it in the Nurses Milk, two or three times

pane, Bittony dryed, of each 3jj, Manna 3jjj, Epithamum, Annileeds, of each 3ß, Figs, Raifons Roneds of each 3jjj, then boyl all this in a close Decoction again, and distill it in the strongest Balneo. The Dose

is three spoonfuls first and last.

This is an excellent water, and that purgeth the Lungs exceeding well. Also it is excellent for women that are with Child, it moderates the extraordinary heat of their bodies, it easeth the pain of their Legs and Back, and will cause them to have an easy delivery, it helpeth the hardnesse of the Matrix, used by Injection; Praise God.

This is the twelfth and last Point; This doth heal all Ulvers of the Yard, Fistulaes, and all such kind of sores; It cleanseth and closeth the Matrix, it healeth the Reins, and strippings of the Urine, it is also an excellent thing to heal any inward wound.

Re Valerian, Ysop, of each 3jjj, Tutson, of the black ripe berries of the privet, Ivy berries, Clownswoundwort dry or green, Incocuum, Leaves of Tobacco, Spearmint, Bramble leaves, of each 3j, Plantine water, three pints; boyl these in a close Decoction, and distill it in the strongest Balneo, and use this by injection. You may give 3jj inwardly, it will heal any strain, or Rupture of veins broken inwardly, and with Lint wet in it, and laid to any green wound, healeth it speedily; Praise God.

An excellent Medicine called the little Page, good for the running of the Reins in men or women, and for the Flux of the belly when it is white, which is the hardest to cure of all Fluxes.

Re Green Rye before it be shot to Ears, and some alfo before it be Ripe while the Ears are yet green, and take of that distilled water, and the water of Sloes, of each one pint, then add unto it of dry Rosemary, Sillio feeds, Mace, of each 31, Fennegreek, Cardimum, Cinhamon, Crocus Martis, of each 3ij, fix Nutmegs, Flowers of Pomgranates, the red berries of Eglantine. of each 3j, Pomgranate rinds, the rinds of Pomecitron, Mithridate, Tormentil Roots, of each \$6, Cloves 3/B, Labdanum 3B, the inner rind of an Oak 3iii. Ifing glasse 3v; boyl all these together in a close Decoction, and distil it in the strongest Balneo. The Dose is three spoonfuls first and last. Then take the feces and day them to powder, and let the Patient take as much of it in Milk as will lye on a fixpence, boyled with the yolk of two Eggs, and a little weaten Flower, Cinnamon, one Nurmeg, and a little Sugar to your last; this is also very binding; Praise God for it.

The second Medicine of the Little Pages for the delivery of women in Travel, and to cause a sure Conception.

Re Of the great Root of the great Osmond 3j, our Ladytrace Roots Herbs and Flowers 3jj, of Hypericon, Maiden-hair, Centum Nodio, Lyons foot, of each 3j, dry all these into a Powder, then take of the Albathos horn calcined 3j, Sea horse tooth 9j, Unicorns horn, Bezoar

Bezoar stone, Ambergris, of each $\Im \beta$, grind all these together with the first on a marble stone, mixing it exceeding well. The Dose is $\Im \beta$ with as much white Sugar, in seven spoonfuls of Almond milk; let her drink this in her Travell, and it will presently deliver her; also if a woman drink it now and then, it will cause her presently to Conceive.

An excellent Medicine called a Ladyes Farm.

Ry Of the water of Pompions, water of milk-Thiltle, water of the Herb Fennegreek, or instead of it, house Chick-weed water, Endive water, Burrage water, of each one pint, then add to these, Manna 3v, drawn Cassia, Liverwort, Bulls Ears, of each 3jjj, Tormentil roots 3jj; boyl these in a close Decoction, and distilic in the strongest Balneo.

Then put to this distilled water of Cinnamon 3ji, Anniseeds, Fennelseeds, Carrawayseeds, of each 3ji, Elicampane, Nutmegs, Liquoris, of each 3 \beta, boyl this in a close Decoction again, and distil it in the strongest Balneo. The Dose is three spoonfuls, this is an excel-

lent Fann, it lacketh but its Handle.

A Handle to the former Fann.

Re Of distilled Milk three pints, Mithridate 3; Saffron 3B, Lignum Aloes 3; Lignum Rodium 3; B; Saffafras wood, China, Galangal, white Amber, of each 3;; boyl these together in a close Decoction, and distil it in the strongest Balneo twice from the Feces.

This water of it felf doth help the trembling of the Heart, also it is a great opener of the passages of the Lungs.

G 2

The

th

fu

T

W

The first water worketh the same effect, but both together they are admirable, drawing away all pains of the
head, curing the falling sicknesse, taketh away the heat
and rednesse of the face, purgeth the Liver, and also
dissolveth the hard knobs of the Lungs, called the stone
Pox, or Pock, as you may see it in Beasts like hard Gravel; It expelleth all venom from the Heart, it's a good
Cordial, it's excellent in Consumptions, as shall be
more plainly laid down in the third part following.

The third part of the Fann.

Re Pearls, Coral, of each 3β, Iear, Boars-tooth, Ivory, of each 3jj, white Amber, the purest Harts-horn, Lignum Aloes, of each 3jjj, of the Buffants horn, Unicorns-horn, Bezoar, of each 3β, Ambergris 9jβ, work all these into a fine powder, and put to it of the purest spirit of Sack one quart, and let it insuse seven dayes, then boyl it in a close Decoction, and distil it in the strongest Balneo. The Dose is half a spoonful.

This is an admirable Antidote, it expelleth the throngest poyson in the World, and cureth Intoxicum ad tempus, it delivereth women in their greatest danger

that may be, and giveth them life again.

Then take the first two former parts of this Fann, and rut their waters upon these seces, and boyl it in a close

Decoction, and distil it in the strongest Balneo.

Then take this last distilled water from the feces, and put it unto the third and last water distilled of the third part, in which was the spirit of wine, and put all the three waters rogether, so your three waters be but one water, which is your Fann perfect. The Dose of this water now perfected and put all together, is one spoonfull, and worketh all the aforesaid effects, and much more

more, for it is not to be declared. But let God have the glory now and ever more,

Now in the second place I shall fall upon the womans matters, that is, the diseases of the Matrix, and its particular defects, the Medicines which are appropriated thereunto follow.

First a general Medicine for all women in the world.

Re Of Nutmegs pounded two pound, put to them three pints of Burrage water, Carduus water one quart, spirit of Sack one pint; boyl this in a close Decoction, and let it stand fixteen days to putresse; then distil it in the strongest Balneo; then put to this water of the juice of Pomegranates ξiji, and of the rinds ξiβ, drawn Cassia ζi, Mithridate, Cinnamon, Kernels of Pruen stones, sweet Almonds blanched, Orange rinds, Oculus Christi, of each ζiβ, Cloves, Sanza, Pimpernel seeds, Tormentil roots, Marygold slowers, of each ζiji, Red Sage ζijß, Sassafras, China, Eringuish, of each ζiji, Anniseeds, Fennel seeds, Carraway seeds, of each ζiβ; boyl all these in a close Decoction, and distil it in the strongest Balneo.

Then put to this water of Labdanum, Muthridate, of each 3j, Coral. Pearl, white Amber, of each 3ß, Albathos horn 3ß, Civet fix grains, Musk three grains, Bezar flone feven grains, Amber-gris eight grains; let this infuse nine days, then distil this in the strongest Balneo. The Dose is one spoonful.

This is an admirable water, it stops all kinds of fluxes whatfoever, and dryeth up the cold moisture of the body,

 G_3

and it ripeneth in them the parts of conception, and caufeth them to conceive, it is also an excellent Cordial; it expelleth poyson, &c. Praise God for it.

I think it will be necessary before I do proceed any further, to speak one word or two of the Causes hindering

conception, and they are three.

First, a cold and moist body, communicating the same to the womb, wherein it becomes a moist slippery slegm, which makes the womb lose her retentive faculty, it being cold, moist, and slippery, she cannot retain the Sperm and Seed when it is injected in unto her. And this defect is chiefly common amongst women, which may well be remedied.

Secondly, the body too hot and dry, causes a hot humidity to descend with the purging moisture, which creates in the womb a falt flegm and choler, which calcines

the Sperm when it is injected in unto her.

The third is wind, which weakens the string of conception, and by its ill motions keeps back the natural hear, or nourishing hot moist vapour from the womb. And now we shall proceed to the cure of these obstructions first, and declare the Medicines which cause conception, and retains it in the womb till the full time.

First to strengthen the string of Conception which hath a knob at the end, by which the child is held by the Navel, and taketh nourishment, and to ripen that kernel, till which time none can conceive. This Medicine is an excellent thing for any woman; it maketh them to keep their child and nourish it; it also breaketh wind, and keepeth the body in good temper.

R Dandelion, Ribwort, Broom flowers, Dragons, Nep Nep Royal, Collombines, Milk Thistle, the herb Metcury, of each 3vj, Rosemary, Eringuish, of each 3jjj, Satirion 3jv, Violet flowers, Clovegilly-flowers, Bonewort, Salomons Seal, Pimpernel seeds, of each 3j, Galangal 3jj, Alexander seeds 3ß, Cinnamon, Scabious, of each 3jß, Cloves, Castorium, of each 3j, Sastron 9jß, Pound all the aforesaid herbs well, then put to them water distilled from Milk one quart, Rosewater three pints; then boyl it in a close Decoction, and distil it in the strongest Balnco. The dose is one spoonful.

For Conception.

Re Of the little white Lady Nuts 3j, and calcine them, and put to them one pint of Sack, and let it infuse 24. hours, then filter it, and take fine wheaten flower, and white Sugar, of each a little quantity, with a little Carraway seeds, and a like fresh Butter, then knead this together with the water, and make thereof little cakes, and let the patient eat them often.

This is a matrer to shadow your Nuts, and this will

furely make her conceive.

To make a womans body apt to conceive.

Re Deanwort water, Germander water, Eglantine water, Rosewater, the water of Rosa Solis simply distilled from the herb, of each one pint; then add to these waters Satirion roots, Parsnip and Skirret roots, of each 3jv, of the slesh of Dates 3jij, Cinnamon 3jj; boyl all these together in close Decoction, and distil it in the strongest Balneo. The Dose is three spoonfuls. And this is an excellent good thing for any woman.

G 4

Another

Another.

There is a water distilled from the Speces or Spawn of a Carp taken in May before he shed the spawn, which is

good for conception.

Re Of the Spawn this, of the meat of Crabs, Satirion, Eringuish roots, Persnips, of each 3jj, Rosewater, Bugloss, of each half a pint, Angelica water one pint; boyl it in a close Decoction, and distil it in the strongest Balneo. The Dose is two spoonfuls twice a day, let both

parties take it.

There is in a Carps head or neck a stone or bone three square; take that bone in May, and wear it in a bracelet about thy arm or neck, and it is excellent against witcherast, and no evil Spirit shall have power over thee. It doth the same for the Falling Sickness, but especially if it be drunk in Plantane or Hysop water. The Dose is one of them beaten very small.

An excellent Medicine for women that have cold and moist bodies, by reason of which they cannot conceive.

By Of the young and tender shouts of Hops, the young and tender shouts of Grapes, and the shouts of Bayes, of each this, and put to it three pints of Rose or Plantane water. Then boyl this in a close Decoction, and distil it in the strongest Balneo.

Then take Cloves bruised in a Morter #6, put to white wine one quart, and boylit in a close Decoction, and distilit in the strongest Balneo, and put this water

to the first.

Then add to them Cinnamon 3j, the flesh of Dates

ZB

3β, Galangal, Pimpernel feeds, Tormentil roots, of each 3j, Caltorium, white Amber, of each 3jj, Sea-horse tooth, Mithridate, of each 3jjj, boyl this in a close Decoction, and distil it in the strongest Balneo. The Dose is two spoonfuls twice or thrice a day.

And this used with a Siringe into her Matrix, doth

cleanse and scoure those parts.

Another for the same.

Re Cinnamon 3jj, Galangal 3j \u03bb, Sassaperilla, Maiden hair, Sassafras, the herb Scabious, dried Bettony, dried Hysop, Cordial flowers, Rosemary flowers, the ripe red berries of Eglantine, of each 3j; Put unto these of Hysop water, Broom flower water, Bean flower, Broath water, of each one quart; insuse all three of four days, then boyl this in a close Decoction, and distil it in the strongest Balneo.

Then put to this distilled water of Cinnamon 3j B, Cloves, Ginger, of each 3jj, Long Pepper 3j, Castorium 3j B, dried Orange rinds 3B, Anniseeds, Fennel seeds, Carraway seeds, of each 3jj, Lignum Aloes 3j, Liquonis, Mithridate, the wood of Sassafras, China, Eringuish, or Eringo roots, of each 3jj, Sassron roots. 3v, Crabs eyes 3jj. Then add unto all these one pint more of Rosewater, then boyl it in a close Decoction, and distil it in the strongest Balneo. The Dose is two spoonfuls.

This is an excellent water, and it will make perfect in a woman what is imperfect (that is the string of Conception.) It stops also the overplus of moisture, and gives the true natural heat into the body; for the which

praise God in the wisdome of his Creatures.

000

R

Another for a womans cold Body.

Re Of Satyrion in their flourishing time, both the Flowers, Leaves, and Roots, altogether one pound, or one pint of its water, of Cordial Flowers one pound, Rosewater half a pint; Distil these together, then take Civet, and Amber, of each nine grains, and steep it in a bag, and insteed of Rosewater, you may put in the simple water of Rosa Solis half a pint if you can have it. The Dose is two spoonfuls.

Re Of that Satyrion sprooted in the Leaves, the Roots thereof, and let the woman wear them about her neck, and she shall Conceive. The Flowers dryed and so worn

as aforesaid, will do the same.

My great Lady Nut which I call a Qualk, worn as a-forefaid, will do the fame.

Another to retain the Child in the Womb.

Re Calvesseer water one pint, sweet Marjoram 3/3, dryed Scabious, the Herb Sassafras dryed, of each 3/3, boyl these in a close Decoction, and distil it in the strongest Balneo.

Another.

Re The Roots of Salomons feal, and let them be Candied, and it will strongly contain the Child if she eat of it every day, this is an admirable thing; Salomons seal Roots being gathered at the sull of the Moon and worn uncandied, do add much strength to Conception, and strongly retaineth the Child in the Womb.

Another

Another to retain the Child after Conception.

Re A great Limper shell, and fill it full of Sanguis Draconis, and let her bind this upon her Navel, and wear it continually, and it will assuredly retain the Child.

The first Medicine of the second Part of the Author, concerning the Parts belonging to Conception.

Re Wild Sage two handfuls, Tormentil Roots 3vj, Chickweed on the Land, Broom flowers, Pennyroyal, Woodbine leaves, of each 3j, Cordial flowers 3jj, bruife well all these together, and put to it two quarts of whitewine, then boyl it in a close Decoction, and distil it in the strongest Balneo. The Dose is six ounces; but before you drink it in the morning, you must steep two branches of Burnet in it all night, and so in the morning steep Burnet, and so let it insuse, and then drink it in the evening; thus it ought alwayes to be used, Praise God for it.

Another for the Same.

Re Lyons foot 3j, our Ladyes Trace Roots, Leaves, and Howers, Sparrows tongue, Time, Oculus Christi, Scabious, Nutmegs, Cloves, of each 3β , put to these of Rose water, and Dragons water, of each one pint, then boyl it in a close Decoction, and distil it as before. The Dose is three spoonfuls, with seven grains of the Powder of Cloves first and last; and this it ought chiefly to be for a young woman that never had a Child.

Another for the same, and also to bring down the terms.

Re Of the Herb Rubert one handful and stamp it, and bruise out the juce, and so much of the juice of Hounds tongue, put them both together, and add to it two spoonfuls of honey, powder of Aniseeds, powder of Cloves, of each 311, white Sugar 311; seven spoonfuls of wheaten flower, knead all these together with Rose water into a paste, the which you shall bake in little thin Cakes, and let her eat of this first and last, and it will assuredly do it, for the which praise God.

An excellent Medicine for the Delivery of the Child, and of the after-birth it is called the Marigold for the Countesse of Bedford.

This doth absolutely deliver women, bringeth down the after-birth, giveth them strength, comforteth the heart, expelleth wind, expelleth poyson, its an excellent Cordial, and its admirable for many other things.

Re Of the weak spirit of Sack one quart, add to it of Boats tooth, yellow Amber, of each 3j, Albathos horn, Bulls horn, of each 3j, Harts horn 3jβ, of the top of a Goats horn 3jjj, Unicorns horn, leaf Gold, of each 3j, Coral, Pearl, of each 3jj, Musk three grains, Civer seven grains, Ambergris 10 grains, boyl all these together in a close Decoction, and distil it in the strongest Balneo, and keep this water by its self; then take one quart of Rose water, and one of Dragon water, and put it into the seces; and put to it of Galangal, Castorium, of each 3jjj, Spikenard, the slowers of Rosemary, of each 3jj, Cordial slowers, Pimpernel seeds, Tormentil Roots, Aniseeds, of each 3jj, Fennel

Fennel seeds 3j, Cinamon 3jv, Cloves 3jj, Liquoris 3v, boyl all these in a close Decoction, and distil it in the strongest Balneo; then take the first water, and put

to the fecond. The Dose is two spoonfuls.

And when she is in travel, let her take a little of the juice of Vervain, and a little of the oyl of Mace; and a little of the oyl of Almonds, and a little Aquavitæ, and mix all these in a Sawcer, and with this anoint her Navel, and this will make the string of Conception to let go very speedily and quickly.

A Medicine for a cold Body of a Woman, it is called the Marigolds first Child, it is good for Conception also.

R Of the pure spirit of Sack, Rosewater, of each one quart, then put to it of Juniper berries 3 \(\beta \), the wood of Sassaffaras, Red Sage in powder, wild Time dryed, of each 3 \(j \), Elicampane 3 \(j \), Liquoris, Ysop dryed, Scirret Roots, Lignum Rodium, Nutmegs, of each 3 \(j j \), Eningo Roots 3 \(j v \), Lignum Vita, Lignum Aloes, of each 3 \(j \), then boyl this in a close Decoction, and distill it in the strongest Balneo. The Dose is one spoonful.

The Marygolds second Child, an assured remedy to make a Woman Conceive, and when she is conceived, it will Retain the Child in the Womb very strongly using it now and then, she may take it in Wine, Beer, or Ale.

Re Sassafras wood one pound brought to powder, and put to it one pottle of spirit of Wine, and let it insufe seven dayes, then boyl in a close Decoction and put it in a retort, and distil it in the strongest Balneo, and you shall have a fine Oyl, and if it be too weak, distil it

in

in dry fand, then do you separate the Oyl from the spirit; Then let her take this Oyl four days, Morning and Night, and this will prove essectual.

The vertues of the Eagles-Aone, it is white and round like a Tennis-ball, and hath a stone that shaketh within it.

Being worn it delivereth women in their extremity, but at any other time it is not to be used by them that are with Child. It is good to be worn for the stones It is good to be worn for Feavers and Plague. It doth also dissolve the knobs of the Kings Evil, being bound to the place grieved.

To bring down the terms in three hours.

Re One good Clove of Garlick peeled, and take the pith of the stem of a Coalwort, and pare for a Pessary, make fast the Clove of Garlick at one end, and sew it in a fine Sarcenet, and use this as a Pessary, and let her keep her bed, and this will surely do it.

Eleborus rowled at the end of a flag will doit.

Another Speedy way.

Re three spoonfuls of the juice of Eleborus Niger, Dacus, and Southernwood, of each one spoonful, two yolks of Eggs, three spoonfuls of Hony, and half a dram of Salt; boyl these together in a dish to a height, and make thereof a Pessary, the which you shall sew in very fine Silk or Linnen, and so use it, and this will do it with great speed.

This also is an excellent suppository as ever was

A Bath for the same purpose.

Re Of new wort as it runneth from the Malt fix gallons, and put to it two handfuls of green Broom, and Clary, Featherfew, Hemlock, of each a good handful, or in stead of Hemlock two handfuls of Pennel, boyl these together, and when it is well boyled let the woman fit over the steem of it close covered, and sweat as long as she can endure it, after that sweat in her bed, and the next day purge, and she will have her Terms.

Another Speedy Medicine for the Same.

Re Dry Starch roots leaves and all, dried Dragons, of each 3j, and put unto this one pint of Sage water, and boyl this in a close Decoction and strain ir, and use this by injection, and this will do it.

Another.

Re Parsley water one pint, Boras 3j, Sassron two penny worth, Galbanum as much as a Pease, and work them well together, and put unto it of the red berries of Eglantine as they come from the Trees pounded 3j, and let all insuse, and then strain it, and divide it into six parts; and drink of it three mornings together, and let it come not neer the fire. Take this the day before the new Moon, the day of the new Moon, and the day following. The Dose is about 3jj \(\beta \) first and last.

If the Arrow-head-stone be worn about the body of woman it causeth her to conceive, and to keep her Child; it is also convenient to make a bracelet of them.

forthey have a special Vertue against the Palsey.

The virtues of the speckled stone, called the Kidneys stone.

Being worn about the Neck it cureth the Kings-Evil, being worn, and four ot five grains drunk in white wine, helpeth the stone of the Kidneys.

No woman will conceive whileft she weareth one of

these stones about her neck.

An admirable Medicine for the Whites in women, and for their pains in their backs.

Re Tent one quart, put to it Cinnamon, Nutmegs, of Briers balls, of each 3jjj, Pomegranate rinds 3ß, Isinglass 3jß, China 3ß, Sea-horse tooth 3jj; boyl this in a close Decoction; then press it and vapour it to a thick substance, and when it is indifferent thick, put to it three yolks of Eggs well beaten, Mithridate 3jj, Crocus Martis 3j, and so mix it all together. The Dose is 3j in the pulp of an Apple or Marmalade, and this will surely stay it, but first purge.

Another.

First purge, then take this water following.

Re Dry Rosa Solis 3j, Isinglas 3 ß, Linseeds, Tormentil roots, Cinnamon, of each 3j, three leav'd Grass, Sparrow tongue, Pomegranate rinds, Nutmegs, of each half an ounce, Penny leaves 3 ß; then put unto this of Tent one quart, boyl this in a close Deco&ion, and distil it in the strongest Balneo. The Dose is fix or eight spoonfuls two or three times a day.

Pruens \(\frac{3}{j} \), Sea-horfe-tooth, yellow Amber, of each \(\frac{3}{j} \), Stags-horn \(\frac{3}{jj} \); boyl all these together in a close Decoction, then presse it, and put to that Liquor, Ginger in powder, Labdanum, Crocus Martis, of each \(\frac{3}{3} \), Nutmegs three, yolks of Eggs three, boyl all these in an open dish unto a dry powder, and if it be not well dryed, dry it in an Oven, The Dose is \(\frac{3}{j} \) \(\frac{3}{j} \) in milk, two or three times a day, and this will stay the greatest Flux that ever was; Praise God for it.

Against the Wind Colique.

R. Castorium, Ginger, Saffron, Civet, of each 3j, Galangal 3jj, Opium 3jβ, Euphorbium, Ambergris, of each 9j, Musk five granes, make this into pills with Syrup of Mint and Mugwort, it cureth beyond all hope. The Dose is from 3 β to a 3j.

Against the Gravel and Stone in the Reins and Bladder.

Re Sack one quart, Fennel Roots pithed, Parfly Roots pithed, of each three, Juniper berries 3j, distill this in Cineres, being first insused. The Dose is 3jj, and in five hours it breaketh the Stone, Slime and Gravel, and causeth one to pisse well and easy.

An Addition to be added to the Medicine for the Stone.

Do not give it in whitewine, for that is too strong and peircing; but it is best to give it in Plantine water, which is gentle and healing, or in Ysop water, and put to your dose fix granes of Bezoar stone, and five granes

of white Coral; The Bezoar will go to the Passages of the Kidneys and Bladder before the Medicine, and open them, that the Medicine may have a free passage to the Stone and Gravel, put a little Sallet Oyl upon his Navel.

To scour the Reins, and to avoid the Slime and Gravel

Remel Roots pithed, of each of these a like, distill this in Balneo, first stamp the Herbs and Roots. The Dose is 3j.

And you may take new Herbs again and stamp them and distil them in the former water, and so it is the stronger; thus you may make it very strong to your defire.

An excellent Cimet for heat and wet.

Re Unflacked Lime, and new Curds, and grind them together on a marble stone, or mingle them well with water distilled from Batm and Yest.

Of the Withy Leaves.

The black Leaves of this Tree are Magical, and Medicinable, and works present effect.

There is a Crocus Albinatus in a quarry, in the end of the new walk in Greenwich, in a white Starre, somewhat Yellowish.

Re 3j of Mercury, and put it into the Crusible, and H 3

othe Crusible a little of this Calx and stir it, and so do often, and this will fix your Mercury, and then you may pour it into an Ingot, so that you have him perfectly fixed, this is also a good Colour for Painters.

A good Diet Drink. !

Re Sack one gallon, Eringuish, Sanza, of each \$\frac{1}{2}\text{, Polipodium \$\frac{7}{2}\text{, Cinamon \$\frac{7}{2}\text{, Annifeceds \$\frac{7}{2}\text{, Sential \$\frac{7}{2}\text{, Liquoris \$\frac{7}{2}\text{, boyl this in a close Decoction, then presse it, and put to this Liquor, Burrage, and Buglos water, of each one quart, Rose water one quart, milk-thistle water one pint, Sassafras wood \$\frac{7}{2}\text{, China, Liquoris, of each \$\frac{7}{2}\text{, Eringuish, Polipodium, Sanza, of each \$\frac{7}{2}\text{, Senna \$\frac{7}{2}\text{, Cinamon, Anniseeds, of each \$\frac{7}{2}\text{, put all these to the first Decoction of Sack which you pressed, and boyl it again in a close Decoction, and when it is cold, distil it in the strongest Balneo. The Dose is \$\frac{7}{2}\text{, or nine spoonfuls.}

Against a Spuma, Scum, Froth, or Fome, which is a grosse or hot thing, or humor, which is very grievous.

Re Violet water, Plantine water, of each one pint, Mithtidate 3iii, Sugar 15 \(\beta \), Grains 3 \(\beta \), Comfry, Angelica, of each 3ii; Boyl this in a close Decoction, and filter it, and use it for three weeks, it will make you as sound as any man, drinking a good draught every Morning and Evening, it will make the said Spurna to go downwards, and so avoid.

And the same was been been as the

If the former be too bot, ufe this following.

Re Violet water, Plantine water, Bawm water, Carduus water, Burrage water, Ylop water, of each half a pint, Mithridate 3jjj, Sugar 15 \(\beta\), Grains \(\frac{3}{3}\beta\), Liverwort, Chesnut Curnels, of each \(\frac{3}{2}\)j, Saffron \(\frac{3}{2}\)j, Comfry, Angelica, stone Hony, of each \(\frac{3}{2}\)jj, Cinamon, Liquoris, Hore-hound Leaves, of each \(\frac{3}{2}\)j, Anniseeds \(\frac{3}{3}\beta\). The Dose is two spoonfuls thrice a day, continuing it three weeks.

Good at any Times

Oyl and Tobacco heal all Sores.

For any Aches.

Re Oyl Olive one pint, Turpentine half a pint, falt of Tobacco 3jjjβ, Salgem, Salarmoniack, of each 3jjjβ, distil it, or else make an oyntment for old Sores. You ought to purge in the cure of all old Sores.

A gentle Purge.

Re a few drops of Aqua Ardens, Aloes Secarrina, of the purging Syrup, of each 3j, Galangal, Mastick, Anniseeds, Fennel seeds, Cinnamon, of each 3j.

An excellent Secret of Sennato Purge.

Re Senna beaten to powder this, white Wine, Hylop water, Polipodium water, of each one pint, then steep two leaves of Tobacco in it 24. hours, and distill it in the strongest Balneo.

Then put into this distilled water of Rheubarb,

Diagredium, of each 311, two Dactiles, Mace 3 B, Cloves three; then pound all these and put it into a bag, and let it insuse and lie in the distilled water. The Dose is 3111, this will purge excellently, and the water will not alterite colour.

Part

沙里是是是一个

Part III

The Denarian Trad.

Aving confidered the so many parts of excellency in the Essences of Nature, according to its graduation in every Species, which is for the manifestation of its own secrets, lockt up in its Center, I have made bold without the consent of Ignorance, to attempt this kind of Learning, though so much a stran-

ger amongst us at this day.

This Denary or number Ten, is the highest number according to the largest extent of Nature; for the number Five being the Spirit or Quintessence, joined with its body, the number Four, or the four Elements made pure, out of this number Nine, or by the Conjunction of Four and Five, the Sun of perfection is brought forth, which is the number Ten. As a Child is procreated in the womb of its Mother for nine months; so out of the number

Nine

Nine proceeded one, which is the Childs perfection, I say the child it self, which is the tenth Number, or the perfection of Nature. Those that are wise will be sober, and consider wisely of the works of Nature and Art. The sour Elements subsist by a Fifth Essence, which is their quickning Spirit, by which they perfect all things, according to the Kinds of Seeds, and matrixes which are within Natures bounds; so Art out of something (like Nature) by digestion only converts the four Elements into a fifth Essence, which is the exaltation of Nature. This sist Essence of Art joined with the fifth Essence of Nature makes the number Ten end in Perfection, that is, in Unity, or One, as at first.

Some will say this is a high obscure Speech; others will say it is non-sense. Let the seed fall on what ground it may, I shall lose nothing. But for the sakes of some I shall in the subsequent Discourse open the secret, with the Physical use there, of the Numbers Quaternary, and Quinary. Because I would have you Proceed to more high and weighty matters, in the Physicks of the Natural Principles, which if the Lord permit I shall shew, how with ten Medicaments all diseases may be cured; Before Hippocrates there was but one Medicine used; Therefore must you observe two things before we come to this our Denary; which many Learned Doctors have practised in seeking and restoring health.

The first concerns the Soul and Mind.

The second the Body.

For as man is composed of Soul and Body, so there are found many Diseases which regard each of them; some arise from the weak and doubting mind, which not knowing its proper strength and faculty, yields to all sorts of Evil.

Mence all those Evils which proceed from the Demons of the South, under whom are contained incantations, Magical works, the Influences, and Curies of Demons, and other Evils which do predominate over e-

very one.

Now whereas that to every abstracted power, is subjected a corporal power, as Experience teltifies, nothing can be produced nor acted, that doth not arife from an abfracted power; wherefore many rare Doctors that were before Hippocrates, did only make use of the faculty of the Spirit and Mind, without any Corporeal Medicaments to cure all Diseases, meerly by the will and Imagnation of the Patients. They did not only cure all Dileases; They did not only raise the Dead; But commanded the Elements; So that the Water became solid or fixt; And Steel became Air; And thence did proceed Rain, Hail, and Clouds: And that with any order: The Earth was made rare and thin by them, to that they bould penetrate into the Depth or Center thereof, as is Recorded of Orphens; The Fire which is of its own Nature cannot but burn, was by them made colder than the Water: in the effecting of these things, there is a ceruin Vehicle or Conjunction, which confifts of an abfracted and most simple thing, and of another which is certain Medium, conjoyning the abstract with the boy: So when there are two faculties conjoyned, whereof the one operates by the will alone, by the fight only, nd by the fole imagination, (that is) at that time when the Soul is fed and filled with the Divine influence, nd dictates of the Spirit of God, as ir is faid by Chrift. My Father Speaks and I Speak, My Father Works and Work, (that is) the power of the Divine Nature, peaking and Working in him, or in his Human Nature, by

by the power of which Union he could say, So I Will to I Command, without adding any Corporeal help thereunto; Also I beseech the Reader to understand the precedent words of the Conversion of the Water, Earth and Steel, to be nothing else but the Conversion of the Elements by a Philosophical and Chimical operation.

This is that Cabala, by which all those who have wrought miracles from the beginning of the World die operate. Before the comming of Christ this faculty di flourish very openly; But now there hardly remains memorial of those divine things; now it happens because of the Blindnesse, Vnbelief, and Ignorance of men who fill keep one the other as Prisoners in the State of Folly and Unbelief, that they will not believe the won of God, nor the promises of Christ and his Apostles, for this cause we have a plain Text, which saith, what soever yee shall ask in my name without wavering or doubting shall be given unto you; And it is the more admirable an miraculous, Because if he who asks hath but so much Fair as is one Grane of Mustard Seed, he shall do more an greater miracles than Christ did; Hence it appears, the the chiefest Instrument, not only to cure Diseases, bu also to do many other rare things, by that first and chief eft part of Man (viz.) the Soul , doth confift in Strong and not Cadent Imagination,

The other way by which the learned and wife men who wrought miracles did proceed, is from the propriety of the thing. Indeed it is to be lamented, that in these Ages the faculties and proprieties of things are not known and also their names and words are hidden. Now to come to the point, I, with divers learned Philosopher do say, that God hath abundantly granted Remedies is to Cure all forts of Diseases, which doth Consist

Herb

ın

(Ap

y

W

het

erbs, Springs, and in Minerals, so that questionlesse every Disease there is appointed its Remedy, and to ery Country are granted fome certain things natural to he place, for to cure the Diseases of that Country. And hus by the great and imspeakable wisdome of God, in linly, which is a hot Country, there grows but very itle Wormwood, and in the Gardens; But a great aundance of Poppey, Hemlock, and other cold Herbs? ence it appears, that cooling things are more needful in hat Country, than those that are hor. So likewise in Poland and Germany, grow Nettles and Wormwood eery where in great abundance, which indicates that hot hings are more requifite for those Countryes, than lings of a cold Nature : And therefore a certain Physian of Norinberg, so soon as he came into any Town. o cure any Body, he took notice all about that Town, those Simples that grew there most frequently, and in reatest quantity, and them he distilled with hot or he carryed ordinarily a lilver Still along with ind thus he did make a certain fifth effence, wherewith e cured all Difeafes in Poland : 800.

And to proceed, this faculty which is called Magical, loth confist in VVords, Characters, and Herbs: It is mown that the Characters and VVords though they may ignifie but little, are fair more powerful, and better han Corporeal things, fo that not only by ten medicanents, but even with three or four VVords, or Characters, all Diseases may be helped and healed that are not o death, because none can live beyond the hour

ppointed to him by God.

It is recorded by a wife Artiff, that the three names God which is of the Linea Santti Spiritus, is of wonderly vertue to cure such Difeases which all men judge incuincurable. I shall make bold to present the names to the Ingenuous, that they may in the sear of God after some zealous and unseigned request gain sayour from the Lord, to know the right use of them. The names are Oro, Ibah, Aozpi, being of three, sour, and five Letters; out of this Line with its Table are drawn many Names of several Powers and Vertues, as Sias, f, m, n, d, these sour be of Physick, add o, to make the Quinary Number Five, and then he will cure admirably by the name of God, Idoigo, the good Angels of health, named under the some Characters are called, and by the name Ardza, they are commanded and constrained to do thy will in curing the party named; without doubt the Operator must be a very God-like, righteous, and humble person; otherwise he will not do anything by the leave and favour of the most high.

let us speak of those ten Medicaments whereby any curable Disease is healed. Picus Alirandula faith, that he who knows how to expound the Quaternary Number by the Denary, doth penetrate into the depth of Sciences. Now while I fay that all diseases may be healed with these ten Medicaments, you must understand it thus; That first one Medicament be used before the rest, and when I say one Medicament, I understand many. I shall now unfold this secret unto you, one of these Medicaments, the moving Opperator; thence you must gather, that no Medicament can be of any Vertue. unless the Physicians imagination be wholly simple and strong, (viz.) that he doth know and acknowledge that the Almighty God can and will, through some effectual Medicament, help and raise the sick, that he may not despair al

espair of Gods Mercy; and his secret Divine induence.

Then must he find it out by the Quaternary, for in one there is no operation, as Pythagoras faith, If one ought to proceed into operation, it must be divided by a Oual ternary; and that I may discover unto you this secret, or mystery, Note, one distemper called by divers names from the variety of the pares, and of the concurring matter. I say one disease is an affection beyond Nature, or not according to Nature, immediately impediting the Function and operation of Nature. Which must be inderstood of the threefold Function, viz. Natural, Vial, and Animal; this can be but the diffemper of ones and the distemper of the Quaternary, I say of one Facusa ry, viz. of the natural Heat, because it ought to have under it felf Organs not impedited, to wit, Spirits, and all other subministrated matter, wherewith it may perform its Functions; hence conclude, that by reason flemper, you must take a punctual-observation of the natural heat, of the faculties and powers, which naturally doth fignific one thing; and because that they being directed to the simple and abstract are the chiefest, you must always draw the beginning from them, that you may not venture upon any thing without due and good confideration. Therefore examine ye well that one, and bring it to operation, that you may always understand to expound it according to the Quinary, that it retains five in it felf, viz. the Alterity, or Mutation under the Matter; and the Matter without Change, and what afterward ariseth thence. The Alterity with the Matter is when a Difease doth atale, either from a simple Intemperament, or from an Intemperament joined with the Matter. Therefore under one Medicament you shall have four, which dorn concern the 11

the peccant Matter, and one that concerns the Alteration.

As concerning those that do alter and change. Those Simples are excellently cold for to alter the extremity of heat, viz. Endive, Cichory, Sandal, &c. And those admirably hot to temper immoderate cold, viz. Wormwood, Mint, and Organy. And an immoderate moisture is cured by the roots of Oak, Plantane, and young Cocks, Poppy, the juice of Pimpernel, Endives, and Beets. And the Firmament of Unity intended into the Quaternary is also to be understood Rheubarb, Colocinchis, Agarick, Hellebore, and Phleboromy, And to purge Choler, Rheubarb and Manna is excellent, And for the Piruite or Phlegm, Agarick and Coloquiptida are excellent. Hippaerates made use of the rind of black. Hellebore for to purge Melancholy in this manner. Take Rheubarb 3j, with 3jj of Manna dissolved in Cicory or Endive water, Trochifoes of Agarick beat into powder 3j, with Honey of Roles dissolved 3ji, the Syrup De Tribus Radicibus, and of Endive water 3jj, add to it for the Gripings, Cinamon water 3j, of the rind of black. Hellebore fifteen granes, Senna in powder 3 & prepared, of the Syrup of Burrage, or Hops 3, &c. 10 1 amil

Now that I may comprehend in this one Medicament what I intend, you must observe, that all the Causes of Diseases are either cold or hot. Now to cure a cold Disease, wherever the distemper be, you must take 3jjj of the Electuary of Hiere Logodium with the water of Endive or Hysop, and simple Honey of Roses 3 \(\beta\), oyl of Vitriol six drops, or so much as will make it tart. And to cure a hot Disease, Take of Rheubarb 3j, Manna 3jj,

Endive water 3ij, spirit of Vitriol to make it tart.

The second Medicament is for the distempers of wo-

Part 3. Section 18

129

nen, and besides ordinary Medicinents, there is nothing better for all the diseases in women than this.

Re of Musa Ænea Djj or 3j, Syrup of Mugwort, or the lesser or greater Triphera, with the syrup of Hysop, except the disease doth proceed from an hidden cause.

The third Remedy is the Requies of Nicolas for to provoke sleep, for to receive strength. The Dose of it is 3j or 3jj, with 3j of Syrup of Poppy, and Endive wa-

ter 31. :

This Medicine hath such a faculty, that by it you may know what may become of the patient; for if he sleep quietly, having received this Medicament, and is better after it than he was before it, it is a good sign; but if he takes no rest, and thereupon grows worse, it is a bad

fign.

The fourth Remedy are the Vesscatories, which are raised either with Spanish Flies, Ferment, or Leaven, which are used especially in Cordial Diseases, or diseases of the Heart, and that which concerns the inward faculties of the humane body, they with a Julip equivalent cure the sick in five days; but if the patient doth not suddenly amend after these Vesscatories, there is no hope of his recovery.

The fifth Medicament is the inunction of Salet Oyl, for to know the event of the disease; it must be thus

uled.

Take Oyl Olive, and with it rub gently the who'e body of the fick party, except the head, if after three times rubbing there appears a moderate sweat, the disease is of some long continuance, but it is curable; but if there arise no sweat, the disease is questionless mortal. But if the patient sweats he shall escape.

The fixth is a Decoction made thus.

Take of Dog tree, of Dyers Berries, of round Mugwort, of each 3j, and of Sparagus Mjj, with a fufficient quantity of Sparagus water well sweetned with Sugar, whereof give 3jjjj to the patient; if after it the patient is eased, it is a good sign; but if not, it is a bad sign, of what quality soever the disease is, whether hot or cold, and in this sweat is a very good sign.

The feventh is Clifters, but they must not be given but only in the distempers of the inferiour parts, as the belly, or in Fevers, and the Iliack Passion, the Stone, or to cool the Reins, the cure of which diseases, one of the ways of operating by Clisters is simple and compound,

Thus.

Take Mallow leaves, Anapugium, and of Brantied in a cloath M jj; make a Decoction in a sufficient quantity of fresh Broath, and take of this Decoction one pint, of coarse Sugar, Oyl of Camomil, and Oyl of Rhu, of each 3j, yolks of Eggs two, of common salt 3j, mix these

together, and give it blood warm.

Now observe in this case, that both hot and cold distempers are sound in the inferiour parts, as the belly; therefore for hot diseases add to the asoresaid liquor, oyl of Mandrake, of Poppies, of Nyphea, and of Jusquiammum: Mark, also for to provoke sleep, and other affections of the Head, altering the Clisters, may be safely and very profitably given, if they be retained a good while, either in hot or cold diseases.

The other fort of Cisters is made with the same Decoction, adding to it for a cold disease, of the Electuary Hirere Logodium, or Benedicta 3j. And in a hot discases add to your said liquor Casha newly drawn 3jj, with as much Syrup of Nenuphor, Linseed one spoonful

bruised.

The eighth is the provocation of Sneeding, especially for the distempers of the Head and Ventricles, as the Italian powder; and if by it I find no amendment, then I am out of hope.

The ninth is for sleep, When the patient is afflicted by a distemper in the intrinsical parts, as in the Ventricles

and Head, which is thus.

Take of Hiera Picra the compound, so much as will make a Suppository, and then give him 3j of Hiera in powder mixt with Syrup of Roles simple, in a proporti-

onated quantity of Cordial water.

The tenth is the use of Lignum Guaicum in cold distempers, and how to know the Spanish Disease. Notes when the Hair sheds, when Lilcers do appear in the tenderest and thinnest places of the body, as the Mouth, Neck, Arms from the Elbows downwards, the Flanck, Buttocks. Secrets, Legs, knobs on the Secrets, The Reins purge themselves by the Grines, in which will rise Tumors with great anguish, which must be broken, and the Impost bag drawn out. Also when crusty scabs and spots do break out in and about the Head and Face, as the Forehead Temples, Nofe Lips; when the extreme members are grieved with anguish, as the Head, Arms, Fingers, Legs, Feet. The shedding of the Hait in this disease differs from the shedding of the Hair in the Alopecia, because that in the Alopeciathe hair do shed by great broad places; but it doth not so in this disease. The crusty spots that doth arise in the Head and Neck, by reason of the foresaid disease, are like Warts; also great pain about the bones, when nothing outwardly can be feen, and yet it grieves not the Arteries. The cure of this difease is with Mercury well prepared with Gold, or with a medicine which thall be fet down at the end of this Denary. Now

belongs to the Body, is to consider how to decrease or increase the blood, then may you operate what you will, and you shall purge the Patient of Choler, Flegm, and

Melancholy.

The second Radix is the Imagination & the Confidence, and generally all the passions of the mind, which must be impretted into the mind of a man; For we must perswade the fick parties that they shall recover, though he himself may have no hope, for Galen faith in his Prognosticks, that a good confidence, and hope, are more efficacious than the Medicine it felf, for he cures most, in whom men put most confidence; Hence Hypocrates faith, that in all Diseases the Mind must be comforted, &c. And if you deeply and seriously consider that great things may be effected by the Imagination and Reason of the Mind, you may freely fay that there is nothing more rare, nor true, nor hidden, nor more fafe, for we read in the books of the Philosophers, concerning their experiences, that to the passions of the mind, are attributed the best and miraculous things; For what Medicine is more hot than Anger, and more diffolving Love, and engendering discord and perplexity than this Anger? and what is more cooling than Fear, and comforting than loy, and yieldirg better food than Hope, and killing sooner, and more destroying than Despair, for with these the Philosophers have done very rare things, all the fecrets of Phyfick do confist in these things, and in those above mentioned. I furt her add what Galenus faith in his Commentary upon Hypogrates his Book of humors, as being an Author much approved by the College; That if any shall say, that the humors of the Body being changed, thereby are changed the actions of the Soul, so that the

actions of the Soul being changed, changes also the hu-

mors he speaks truth.

And it is thus confirmed, because that when the Cholerique passion rules in man he is angry, and so contrarywife, because that when Choler is increased, the complexion of the Soul, and the Animal faculty of the Body, must needs be moved; and knowledge is increased in the Mind by a Cholerique complexion, and contrarily is increased an inclination to study by Melancholy, and delight and walking by the Sanguine Complexion; the Phlegm helps not at all, the Reason of the Soul, but only in the change of things fixed; it then appears, that if the Phylician helps the Complexion of the Mind, whether by Incantation or Adjuration, or by things worn about the Neck, that the complexion of the Body is also helped. Now if a meet remedy is added to these things, the health of the Parient is the fooner recovered, because the Body is helped with a Medicine, and the Mind with Incantation, &c. which being joyned together, the recovery of both must needs follow the sooner; And Ga. len faith, that there are some men who naturally are joyful and pleafant, falling fick, are perswa led by the Physician that they shall soon be cured; and thus min !ing them of their diet, with moderate exercise, their hope is the principal cause of their recovery; And there are fome or a contrary nature, who are alwayes fad, whence their spirits are afflicted and Braightned through cogitations, which Cogitations the Phylician must deceive by rejoycing their intentions, and changing their minds, but not beyond a moderate joy, lest that through the greatnest of promises, they should neglect their own cure.

Things hanged about the neck, do help by a certain

be done for the comforting of the Mind, whereof I shall give you some few examples; Aristotle in his book of Stones, saith, that an Emrald hanged about the neck, or worn on the singer, helps one from the cause of the Epilepsie. There are noble Persons advised to hang an Emrald on their Childrens Necks to preserve them from the Convulsion Fits.

Again a Hyacinth worn on the Neck, or Finger, will preserve one from Insection, if he shall go into an insected place; also he that wears it, is honored in the minds of men, and obtains his Requests of his Betters. Wearing the weight of twenty Barly Corns of the said

Stone, you shall have no fearful dreams.

The Heart of a Kite worn about the Neck or Finger, mitigates Choler, Wrath, Contention, whose Center is like the water wherein is flesh washed, it stops the Flux of blood, in what Member soever it be, especially in women.

A Cythimus hung about the Neck," or worn on the Pinger, increaseth fearful, horrid, and sad Dreams, and

Breeds Quarrels and Contentions amongst men.

The Dung of a Wolf that hath eaten Bones, being applyed to the Belly, or Neck, immediately affwageth the Black paffion; They are sometimes hung to the Leg, and tyed to it with a thred, of the wool of a Sheep eaten by the Wolf; but if you can have no such thing, then tye it with a string of a Harts Skin.

A Serpent of Tyria being hung on the Neck of one who is obnoxious to Suffication, cures them of it, and is of

great efficacy in the Apostumes of the Throat.

The Root of Sparagus being applyed and kept upon the Tooth, draws it forth without pain.

The

The Liver of a Dog, except it be a bearing Birch, being worn about one, hinders the Dogs to bark at him that wears it.

The right foot of a Tortoise being laid to the right foot of one that hath the Gour, and the left to the left, helps the pain, the same power hath it in the Hands.

The Root of Peony hung in childrens necks is good against the Convustion fits. Pyrathrum of St. Ambonies five

dorn the fame.

The reeth of a mad Dog after he hath bitten a man, being worn about the neck, preserves one from the biting

of another mad Dog.

tiem, you shall find in young Swallows, taken at the encrease of the Moon; and if you slit them by the belly you'l find two little stones, one of one colour, and the other of divers, which being tied in a piece of Calves skin, and hung on the neck, is good against the Epslepse, and cures it.

A Cobweb thickly wrought and clean, preferves one who hangs it about the necks from the Quartane Ague. The root of Sorrel being hung about the neck doth the fame effect.

And Plantane roots being worn about the neck, are good against the Kings Evil, and doth dissolve it.

The middle finger of an Abortive, being worn in 2

womans neck, will keep her from conceiving.

Jusquiammum mixed with the mick of a Mare, and laid upon a piece of Harts skin, and hung about a woman's neck, keeps her from conceiving.

If a woman takes a Frog and opens his mouth, and spit

in it thrice, the thall not conceive that year.

The Coral stone prevails much against the Passion of the Stomach, if it be hung on the neck or stomach.

K4

And did we not fee the Load stone draw the Iron at one point or part, 'And driving' it back in the other. we would not believe it : Doth not Lead break a Diag mond which Iron cannot doe? The stone whom is called Star, and in Latin Nittum, cannot be burnt in a hearth. A certain small Sea Fish deprives him of his sences that Fishes him, so we see that some substances which have an incomprehenfible Reason, because of their subtiley: And a reason not subministred under the sences because of its hight and fublimity. This way of operating with irs effect have Relation to the faculty of the Soul and Mind, for the imagination of the patient works his own health by his forceable. Confidence on that thing which is hung about his neck . Therefore it happens fometimes that Children for want of capacity are not cured by this meanes, but they may be cured by Herbs, Roots, and stones, the one gathered at a right time (viz) under the influence of that Planet that Governs the Herb or Root sunder a right Ascendent, and in his own hour, the Moon applying unto him by good Aspect, and the Afcendent and tenth Grong, of the Lord of the tenth fortunating the Ascendent, or Lord thereof, or the Moon, which Example you shall have after the Table of planetary hours, which have

Here I shall set down the Medicine Appropriated, to the tenth Medicament, for the Spanish Disease.
Which is,

A most Rare and Excellent preparation for the French.

Pox, and all Diseases of the Like Nature.

Take of Quickfilver to, dissolve it in strong water,

that it may become a Precipitate, then take distilled Vine gar, wherein disolve your Precipitate, boyling it sour hours, then pour what is dissolved into a vessel of glasse and again infuse it in more fresh Vinegar; and this Rei terare untill the Vinegar hath dissolved all the Mercury, then distil all your Vinegar in Balneo Maria, and in the. Bortom will remain the body like Salt; upon which pour rain water four times dutilled, and concoct it in a close Decoction half a day, then let it settle, and what of it is clear pour out, and distil it in Balneo, and you shall have a clear body, which dry, then divide it into two parts, and uppon one part of it pour some Spirit of Wine, and let it digest eight days. Then draw it in a retort in ashes with a larg Receiver, whence will first come forth the Spirit of Wine, Then the Spirit of Mercury, and in the bottom will remain a black feces; you shall not open the Joynts of your Receiver, within leste than twenty four hours after; Then the Christaline Spirit of Mercury sticks to the sides of the vessel, and ir is not disolved under twelve hours; then having opened the Receiver, extract the Liquor in the Arongest Balneo, and then will come forth the Spirit of Wine, and the effence of Mercury will remain in the bottom of the vessel, as an oyle of an Ashie colour; Then put it into a little veffel of glasse with a very flow hear, then disolve it by little and little in the same vessel.

The other part of your Mercury which you did red ferve being ground to powder, put as much of it into it as may be disolved into a soft body, then seal your vessel, and decoct it in Ashes; And that gradually until it becomes into a Red powder; This is very like the Philo-

sophical work.

The dose is one grain deluted in wine or some other Liquor,

A set of the control of the control of the spine.

If set of the control of the c

van de la company will research the bordon of the land of the land

March which you have as much of which you chid not be a seen of the seen of th

relic sold to sold in wine of force offer.

Table to know the Suns rifing, setting, and the length of the Artisticial Day and Night, shewing bow meany minutes are contained in a Planetary bour both Day and Night for the whole year, and for ever in our Horizon. Whereunto shall be added a Table shewing bow long the twelve Signs continue on the Ascendent, which is of great use in natural experiments, as gathering of Herbs, Roots, Flowers, and Fruits, with their applications to effect Cures.

First to find out what Planet ruleth every hour of the

N S V

h

P

tv

day of night by the foregoing table.

You must know that the Astrologians have appropriated to each day of the week a several Planet, beginning alwaies their Artificial day at Sun rising, and giving that Planet that ruleth the day to the first hour of the day. The Second Planet to the second hour of the day. The Third to the third hour, co. And

2

d

f

2

And Note, That you are to divide the day, that is, from Sun rifing, to Sun fer, into twelve equal parts, whereof fix hours contains the hours before Noon, and fix the afternoon, so you ought to divide every day in the whole year into twelve equal parts, whose twelf part contains one hour Astrological, you must account the day from Sun rifing, until Sun rifing again the next day, which shall make 24 hours.

The seven Planets Govern the seven days of the week

according to the names of the days.

As O Sol Sunday, D Luna Monday, & Mars Tuesday, & Mercury Wednesday, 4 Jupiter Thursday, & Venus Fit-

day, h Saturn Saturday.

Note, that every Planet on his own proper day governeth the first and eighth hour of that day. The first hour beginning just at Sun rising, and his eighth hour begins at

one a clock in the afternoon, As for example.

On the thirteenth day of November, this present year 1659. the Sun rifeth at eight of the clock in the forenoon, this thirteenth day being on Sunday, the @ begins his reign for that day, and his first hour just at Sun rising, and continueshis reign forty minutes, which is the planerary hour for that day. Next after o rules & which is the second planetary hour of that day, she begins her reign just at twenty minutes before nine of the clock, and ends at twenty minutes after nine, at which time & begins his reign, and ends just at ten a clock, at which time Dbe ginneth her reign, and ends twenty minutes before a eleven, at which time, h begins to rule, and ends his hour twenty minutes after eleven, at which time 1 begins his hour, and ends just at twelve, (which are the first fix planetary hours of that day) & beginneth to rule just at twelve, and ends his hour twenty minutes before one. At which

which time @ beginneth his fecond hour, which is the eighth hour of the day; Proceed according to this example to find any hour of the night, if the question be at that time, or to doe some Magical operation. The minutes of the Planetary hours of the night on the foresaid day of November are 80, which must be added to the time of @ set, as I have done in the example of @ rising; do so for every day and night in the year when you would find the proper Planet governing that hour which you would feek.

This example you shall find in the precedent table; where you see November the sourcenth, \odot in 7, three degrees over against which you have the Suns rising, setting, hours of the day, hours of the night, how many minutes are contained in a planetary hour for that day, and how many minutes for the hours of the night, every part several in its own Column, as you may see by their titles, also you must know that the planetary are always unequal, unlesse at which time the \odot is in \checkmark , or \cong , at which time a planetary hour is just sixty minutes, equal to the hours of the clock.

Nov

Now I shall add the Table of the Signs Continuance in the Ascendant, with its Use.

the Sign wherein the Sun is, for that Sign in which the Sun passeth, alwayes is the first sign that doth ascend eve-

ry day for a folar month which is 30 days. The @ motion is one degree in 24 hours, and one fign contains 30 degrees, fo that in twelve months the @ makes his revolution through the 12 figns, beginning his ingresse into Y on the 11th. of March, at which time you have Y ascending with the @ every morning, which is called the first hour of the day.

The 10th day of April, the 10 leaves 17, which fignifies the Head, and enters 8, which fignifies the Neck

and Throat.

The 1sth. day of May he enters it, which fignifies the Arms and Shoulders, and all pains in the joynts.

The 12th of June he leaves it, and enters 5, who rules the Breast and Stomach, and all falt humidity there.

July the 13th the O enters St, who rules the Heart and Back, and pains their refiding, as a Plurisie, Bood congealed, Surfits, the Pestilence, too much heat.

els and Belly, barrenesse in the Womb, or some obstruction there, the Griping of the Guts, or Ulcers there.

September the 13th the o enters a, who rules the Reins and Kidneys, Pains, Wind, and Gravel there, Gonorthea.

October the 14th, the o enters m, who governs the fecrets of both Man and Woman, and fignifies Vicers and Sores in those parts, the French Pox, the Whites.

November the 12th the o enters 2, who rules the Thighes and Buttocks, and Sores, Fistulaes, Heat,

Feavers, Hurts.

December the 12th, the o enter vo, who rules the Knees and Hutts in them, as Strains, Fractures, the Leprofie or Itch.

72

January the toth, the O enters ex, who rules the Legs, with their pains, and the Ancles with their pains, as melancholy, winds in the blood, the Gout.

February the 10th, the O enters &, who rules the Feet, and lameneffe there, as Sores, Gour, the Blood putrefied, Boyls, Diseases gotten by cold and moisture.

Note, if either of these Signs ascend, or descend on the Cusp of the fixth House, or the Lord of the Sign ascending, or the Lord of the Hour, or the Lord of the fixt, or a Planet in the afcendent or fixth afflicting either of the Houses, in what Sign loever it be that doth ascend or descend with that Planer; or ? ? so afflicting, at the time when Vrine is brought onto these for thy Judgement, Judge according to the Nature of the Sign to afflicted, whether afcending on the first or defcending on the fixth House, That part of the Body which is fignified by that Sign is furely afflicted a Judge the fame by the place of the Lord of the Ascendent, the Lord of the Hour, and the D also, in what Sign soever you find either of these afflicted, you may fay that part of the Body fignified by that Sign, is also afflicted in if one of these be afflicted above the Earth, it fignifies the right fide is pained, if under the Earth, the left fide is pained.

Note, as to the Nature of the Disease, you must Judge according to the Nature of the Planer afflicting your aforesaid Significators, also observe the D in what Sign so ever she be, if she be afflicted, Judge the difference according to the Nature of the Sign wherein She is, and Planet afflicting her in that Sign, as if she be afflicted in fiery ligns, as w, A. A. Pestilent Feavers, blood overheated (that is) if she be afflicted herein by & , if she be afflicted by h in either of these Signs, as if in w, Rheums distilling from the Head, Headach, sore Eyes, or dulnesse

T.

of Sight; if in a, metancholy Blood, putrefied Feavers, a heavinesse in the Heart, Agues, Heart Qualms; if in 2, a Defluxion of fubril, thin, sharp Humors, pains in the Joynts, the Blood over heated by some violent exercise, taking Cold upon it, the dittemper is mixed with a Feaver, a hor rumour in the Grine, or in the Buttock; but if Saspect the Din this Sign also, it is a violent burning Feaver. If the D be afflicted in any Sign of the Aiery Triplicity, as are 11, 12, and 12, wind in the Veins and Joynts, afflicts the Party, or the Blood that is corrupted all over the Body; if h be the afflicting Planet, and the Din II, It is a Consumption, of a general wasting; if it be 8, the Blood is wholly corrupted by some sudden aceident, wind in the Joynts, pains all over the Body, or a lameneffe in the Arms or Hands : Dafficted by & in = fome Surfet by eating or drinking, or bytheast of Wenery, pains in the Head and Joynts, or a Sciatica comming from the Running of the Reins, or some other humour; if &, heat in the Reins, caused by Gravel, or the. French Pos, the Blood corrupted, or a Surfet; if D be in afflicted by h, the Party is troubled with Wind, Rifing of the Lungs, or Fits, happily a fore Throat, or a melancholy wearinesse in Mind and Body; if & afflict the D in this Sign, the Blood swells in the Veins, a Feaver, a pain in the Breast, difficulty in breathing, some hurt in the Legs.

Dafflicted by h in the Watery Triplicity, as are these Signs, 5, m, and H; if in 5, the party hath much Flegm in the Stomach, subject to vomit, or hath a Cough, or a Surfet by over eating; thus if & afflict the D in this Sign. But if h afflict the D, the party is afflicted with a cold Stomach, distillation of Rheum, rough melancholy Matter in the Breast, slimy thick Flegm,

Cararres, abundance of spicile and moiture, Coughs hectick Peavers, Agues, a weaknesse in the Reins, and

pain in the Belly, a long Cure.

D in m afflicted by h, Ulcers in the Arsehole or Secrets, Dropical Humours in the Knees and Legs, the Stone in the Bladder; if a Woman, too many of the Whites or Reds, if a Man, Ulcers in the Yard, the Gonorrea; if d'assliet, Ulcers in the Secrets, the Pox, or the like, Hemerods, or Pills, breaking out, the Gonorrea, a burnt prick.

Din X by hafflicted, a Surfet by Cold, swelling in the Throat, oppress with Flegm, a rotten Gough, and much moisture in the Stomach, hurts in the Feet; if & afflict the D, the Body is full of grosse Humours, and Subject to a Dropsie, a continual Defluxion of Rheum,

pains in the Belly, or a violent Loofenesse.

If D be afflicted in the Earthly Triplicity, as are these Signs, &, m, and v, the Disease came from melancho-

ly, as Confumptions, Leprofies, dry Scabs.

D in & afflicted by h, shews Ulcers in the Lungs, a swelling of the Body, Feavers proceeding from obstructions of the Precordiacks and Arteries, (that is) of the inward parts near the Heart, Liver, and Lungs, or occasioned by too much Luxury; if & afflict the D, it shews too much blood abounding, continual Feavers, the Body wholly out of Order, pains in the Neck and Throat, the Kings Evil, or hurts, and fores, the Strangury, Stone in the Reins, or Gravel in the Kidneys.

D in me afflicted by b, the fickness proceeds from crude Humours in the Scomach, and from too much viscous Flegm obstructing the Bowels and Intrals, inordinate Feavers, pricking under the Ribs, sometimes the Wind Cholick with extream melancholy, with the Cour or

L 2

Aches

Aches in the Thighs and Feet, with obstructions of the Womb; if & aislict, then Ulcerations or Flux of the Belly, small Feavers caused by Choler and Melancho-ly, the Wind Cholick, weaknesse in the Legs, hard to be cured.

It D shall be afflicted by h or p in w, the Disease proceeds from Cold or Melancholy distillations, dry Coughs, the Lungs oppressed, more pained in the Night than in the Day, the Head-ach, or a noise in the Head; if d or O afflict the D in this Sign, it shews no perfect Concoction, Choler abounds, a desire to Vomir, a swelling of the Sinews, immediately follows a Flux of the Belly, the Blood is exceedingly corrupted, the Party is Lean, and of an obscure Complexion, little Blood in the Body, inclining to the Yellow Jandise, instamations in the Breast, a Cholerick Humour in the Hands, or Joynts of the Fingers.

when the is in , & or & with either of them, and especially if the be posited in a bad House with either of them, or they aspect her from bad House, as are the sixt, eighth, and twelsth, or if she be besieged betwixt two of them in any place, or with the &; Note the worst affliction that can happen to the b; is to separate from the Infortunes, and apply to the Combustion of the Sun, for it signifies the Party cannot escape according to Nature.

This I thought good to bestow on young beginners, who will not despise the day of small things; some may be contented to eat Herbs, and I will give them leave to eat strong meat that can get it; this will serve for this time and this place, hoping to give the Lovers of this Science, a better dish if the Lord permit me days. I pray accept of this breviate as useful to the hands of

fome

fome, though not to all, who have many books at com-

The Use of the former Table.

Trie first Example shall be of the true time of gathering the Herb Rosa Solis, this being an Herb of the

Sun, and under the Sign 5.

This Herb is fit to be gathered in June, July, or August, at which time it Flowers; Look back to the Table and you shall find Cancer &, who as you may see, continues in the Ascendent 2 Hours and 1.2 Minutes, all which time you have to gather the Herb Rosa Solis, or any other Herb, whose Nature is Governed under the Dominion of &; do the same, in gathering those Herbs which are governed by the other Signs (that is) when they begin to ascend, at that time do you begin to gather the Herb which is for your use, but especially if it be possible at the same time, gather the Herb in that hour whose Planet Governs the same Herb, as if it shall be

the herbRofa Solis gather it at what time & afcends, and also in the hour of the Sun.

As for example.

I would gather the herb Rosa Solis in its vertue to cure fome Difease, as the Consumption of the Lungs, or the defects thereof, because the Radical moisture is most frong in this herb for Medicine, when the Sun shall be in Conjunction with so or passing through this sign, because the Sun Contains in his vertue the Radical hear of all things moving in the world, And being in & (which is) the Lunar-moisture, having in her vertue, moisture, wherein is contained a falt quickening and nourishing all Therefore when the Sun is in the first face of Cancer, and ascending with the Sun in the same Degree. alfo in the hour of the Sun, Luna and the Lord of the renth being in good aspect with the Sun, as a Trine or Sexule, ar that very time I would gather this herb, as you may eafily do on the Toth of June being Sunday 16x0. just at Sun-rising, being the day and hour of the Sun, at which time & doth ascend, or on the 21 of Tune in the fecond hour of the day, because & rules the first hour of the day, beginning at Sun-rifing, and Sol rules the fecond: You may also gather this herb in its vertue just at twelve a clock at noon, at which time the Sun hath his greatest influence upon the earth, from the 18th. day of Time untill the 9th. of July, alwayes observing the time of the best aspects of the D @ and Lord of the ascendent, and let them allbe strong if it be possible; if you would gather this herb for the fortifying of some man against his enemies, or to gain favour from Princes or fome Court of Justice, let the Sun be in his own house in a in good afpect Peets and in Reception with the Lord of the tenth, and the moon as aforefaid, make a Sigil of the Sun in fine Parchment under the same influence aforefaid, and inclose this herb so gathered as aforesaid betwixt both the round pattens of parchment whereon the sigil of the Sun is made, and sew it in with yellow silk, and let the parties name be written on the sigil with the Characters of the Ascendent, and his Lord with his Angel, and then let him wear it about his neck or in his bosome.

Observe the same Rule in gathering all other Magical herbs; either for Physick or other secret operations, as

AMARA DULCIS, against Witchcraft.

The last thing that I shall do at this time, is to shew you how to erect a figure of heaven, with an example how to discover a disease or hurt, the Deing afflicted in the following figure Feb. 23. h.g. m. 15. a. m. and on Feb. the 23d. die 2 165. a Urine was brought unto me, the

Ouestion was, What disease, if recoverable.

I only looked in my Ephemerid, for my Ascendent, which I sound to be II 5.37. also I beheld the D, and finding the last separating from the greatest unfortune h and he being in the fixt house which is the house of sickness, he going into where by a retrograde motion, also afflicting the D in St, and she in the fourth which signifies the breast and stomach, and St signifiing the heart and back. I judged those parts of the body to be most afflicted, and that the man could hardly setch his breath for pain. I also said that his blood was congealed all about those parts, (that is) from his Hipps to his Arm-pitts. I finding II ascending and when triplicity, with the ascendent, and sixt, and above the earth, I said he had a humor set-led in his right-arm, for always I do find by experience.

what fign so ever doth ascend, on a question of sicknesse, that part of the body is infirm which is signified by that Sign then ascending, if the first part of the Sign ascend it shews the upper part of the member to be infirm, as here the 5th, degree of II ascending shews the grief near the shoulder, if it had been the second face ascending or the 15 degree; it would have signified near the Elbow or middle of the arm; if the last face or latter degrees ascend of any Sign it signifies the extremity of that member is offended, which the Sign governeth, as if the last face of II had ascended or the 25. 26. 27.28. 29. or 30, degree should have been on the Cusp of the first, I should have said that the pain had been near the hand or in the hand-wrist, and so judge of the rest of the signs according to their natures, and the member or part of the body which they govern.

If you would fet a figure of heaven for any time of the day or night, when you have your time given by any one defiring a refolution upon some question, you must first seek the place of the Sun in degree and minutes that day at noon in which the question is made, always adding or substracting 15 minutes for every fix hours either before or after noon, and add to the motion of the Moon every day at noon three degrees for every fix hours; observe this in all questions, where distance of time or place is re-

quired.

And when you have found the place of the Sun in some Ephemeris for that year, month, and day of the month, in which you would erect your figure, afterwards or in the next place, seek the same degree of the Sun, in the table of Houses, under the title of tenth house, in the same sign wherein the Sun was found on the day of the month sought; the degree of the Sun being found, look directly opposite to it on the left hand, under the title time

from

rom noon, and b. m. which fignifies the hours and minutes given from noon, unto these hours & minutes found under the title of time from noon, and your time given or what it is a clock exactly when the question is made, and if it be under 24 hours feek the number in the table of Houses, and the number being found go directly in a right line towards the right hand, where you shall find the degrees and minutes of the signs which will fall upon 6 of the 12 houses, and the opposite signs and the same degrees and minutes are to be understood, and placed on the other fix Houses, but if the number found shall exceed 24 hours, then you shall cast away 24 hours, and with what remains feek in the table of Houses under the title of time from noon; your number being found go directly in a straight line towards the right-h nd, where you shall find the degrees and minutes appropriated to the Cusps of the 10th. 11th. 12th first or ascendent, second and third houses which are fix of the 12 houses, the other fix are understood as aforesaid. The figns being placed on the Cusps of the 12 houses, you ought in the last place to placethe Planets with the Dragons head & tayl ? f as you shall find them in fign degree and minute on the day and hour of the year and month in which the queltion is made, this being done you may proceed to judgement.

As for Example.

I would fet my figure on the Urine brought unto me; February the 23 day & hour 9 minutes 15 A. M. (that is) in the morning 1658.

First I seek the o place degree and minute at noon, which I find to be in × 15 degrees and 2 minutes, the minutes being under 30 always we accept of the Degrees found

found, but if the minutes exceed 30 we always add one De

gree to the Degrees wherein the Sun is found.

Secondly, I look in the table of Houses for Sol in & and 10th. House, which I find in the 12th, and last page of the table of Houses, in which line of the 10th. House under x I go downwards till I come to the 15 degree, over jagainst which on the left hand under the title time from noon I find bord or hours 23, minutes 4, unto which I add my time given, which is hours 21 and minutes 15, for fo we count the hours of the day from the noon of one day to the moon of that following: these two numbers being added together makes 44 hours and 19 minutes, I cast away 24 hours, which is the hours of one day, and there remains 20 hours and 10 minutes, which I must seek in the table of Houses, which number of hours I find in the eleventh page, but the minutes being not precise, I accept of the leffer number 17 which we always ought to do ; so that over against my 20 hours and 17 minutes in a right line I have for the Cusp of the 10th.house 2 degrees of at, and for the eleventh 22 degrees and 4 minutes, and for the 12th. house or 8 degrees 52 minutes, and for my Afcendage or first house I have II 5 degrees 37 minutes, on the second house is \$ 2 degrees 22 minutes, the last of the fix houses is the third on the Custo, of which is \$ 17 degrees and 53 minutes; now as I faid before, the other figns who are always opposite to these with the fame degrees and minutes are to be understood, and placed on the Culps of the opposite Houses, which are the fourth, the 5th. 6th. 7th. 8th. and 9th. the figns also are opposite the one to the other, as or to m, & to m Ito ?

5 to w, A to m and m to X thus a, m, z, w, m X, }

In the same manner the 12 houses are opposite the one

le E

Iŧ

n

to the other, as the first to the 7th, the 2 to the the 8th. the 2 to the 9th, the fourth to the 10th, the 5th to the Tith, the 8 to the 12th, as you may fee in the following figure; the figns being placed with their degrees and minutes, on the Cusps of every of the 12 houses, I am in the last place to place the seven Planets and the Dragons head Rand tayl ?? in the figure, in house and sign, degree and minure, as I find them on the 23 of February at moon, I look again for the places of the Planets on the forefaid day, where I find @ Sol to be in X 14 degree and 2 minutes, which I place in the eleventh house, with X intercepted, for fo we call it when a figh falls in any house, and another fign possessing the Cusp of that house, as me doth. after o in a right line I find Luna Din & degrees and is minutes, which I place in a near the Cusp of the fourth house, and Jupiter & falling in the same fign 3 degrees 54 minutes, I place him after the D moon, also I find h Saturn in = 29 degrees 59 minutes, R or Retrograd as R fignifies, which I place in the fixt house, in the same line I find & in v 27 degrees 58 minutes, which I place in we and the 9th. house. Again I find in the next Columne 2 in 2 15 degrees and 14 minutes; which I place in and roth, house. I find g in the same fign 17 degrees and 36 minutes, which being more than Venus QI place after the Q, last of all I find the 12 in m 26 degrees 52 minutes, which I place in the fixt house with me intercepted you are to understand the 23 to be in the opposite fign & and place him with & intercepted in the 12 house. So I have erected my figure, you shall find the Planets in figns, degrees, and minutes, opposite O, D, to, 4, 3, 9, 9, 80, 21 to the 23 day of Feb. thus, X, St, C, St, V, M, TR, S.

At the Head of the Page the Signs thus.

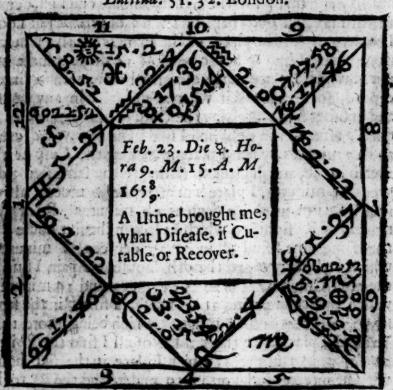

Having

Ė

k

Having done what I think is necessary, in the last place I shall insert the Figure, for our example, you are to understand, that the Figure 1, tells you that it is the first House, and the Figure 2, shews the second, and so round to the 12th. House.

Latitud. 51. 32. London.

This Figure being erected, we shall add something more to the former Judgement hereof known to us by experience, which may add something to our future understanding.

Thi: Man was in Corporiture, a full, strong and lusty
Body

Body, as mand & in so, in Conjunction with &, in a Sign of the same Triplicity, and they being Aierydo well fignifie, & oriental, and in Conjunction with &, and in her Terms shews his Fatnesse, he was Tall withall, his Hair a dark brown, D in Sextile to the degrees ascending,

gives comlinesse.

First the Disease was only an accident (that is) he having a same Horse; he comming unto him trod on his same foot, at which the Horse falling down, threw him down also, and fell upon him, and bruised him very extremely, as the separation of the D from h will well signifie; and his droping betwixt two Signs, also being Retrograde and under the Earth, do well signifie a fall. Also h is in the House of small Cattel, but D being in St, a violent Sign, who signifies Great Beasts, may shew very well that a Horse or the like did give him this accident, that is, a Bruise.

Secondly, the Lord of the Ascendent in Conjunction with a fortune in the tenth, is on fignification of his Recovery, and Cure, also the D in Conjunction with 4 Lord of the seventh, who fignifies the Physician to do him good, also both the D, and 4, are in Sextile to the Degree ascending, all which fignifies Help, and a Recovery; again D and 4 in Conjunction in the fourth House, fignifies the Medicines to be good, and a good end of

the Cure.

The next application of D to the greatest fortune, and they both posited in the very place governing the part of the Body afflicted, signifies the Life to be preserved, and the Recovery of the Sick, all which have proved true; Praised be God.

h, Signifies Falls, Bruises, hurts by wooden Instruments, as to be dry beaten, or the falling of some Ruines

n

tic

un

V

W

to

ga

ines, as Houses that are old, Mines, &c.

16 Religious Melancholy, great Cares, or fears of

the threats of the Law, or fome great Person.

Knives, Spears, Pitch-forks, Gun-shot, throwing of Stones, Quarles, Fighting, Wenching, and Drunkenesse; alwayes Judge according to the sign he is in, as if he shall be in Fiery Signs, apt to fight, in Earthly Signs, he is apt to do a mischief secretly, the same if he shall be in the Houses of h, but if in the Houses of Q, he wencheth, if in VV atery Signs, he hurts by Drunkeness, especially if in the House of the D.

O, Signifies Hunting, much Riding, hurts by Fire,

Grief by Losses.

2, Signifies Surfits, Intemperance, Gluttony, pains in the Head, Back, Belly, and Secrets, happily caused by

Venery, and fuch Foolish Tricks.

may grieve the Party, or something that troubles the Fancy, lif & shall be in the Sixt, and is Lord of the ninth, and in my, if h with him aspect the Dwith an evil aspect, it shews V Viceberast, or the like.

D, Signifies much Travel, Sweating, and Drunkenesse; these Judgements appertain to accidents, that are either

procured, or happen fuddainly.

This is all I intend at present, as an Introduction to what shall follow hereafter, if this shall be well accepted of; but if not, I shall leave something behind me which will happen to the hands of some one or other, but whether he shall be a Wise man or a Fool, that I forbear to Judge; only this I would willingly doe, extend two other Books, the one of Astrology, and the other of Philosophy, having taken the pains, and omitted no oppor-

Ê

pportunity, for the gaining of very good and excellent

hings of this Nature.

As for this present Book, it is like a good VVorkman, who is also an Honelt, Sober, Righteous Person, for I doubt not but that it will get Credit and Estimation into what Country foever it shall happen to come, unlesse into such a place, and amongst such, who have Vertue, Profit, and Truth, of which this Book is not wanting: for what is contained herein, are most high Medicines largely Experimented, and found profitable to admiration, for which cause after Ages will be ingaged to praise the Lord for evermore, that this Book was ordained for the Light; Therefore be Studious, and Practise without Coverousnesse, do Good freely, Increase in Knowledge, and give God the Glory for all his Gifts . Amen
